

### Contents

|         |  |
|---------|--|
|         | Foreword   |
|         | Introduction   |
| 1       | Scope  |
| 2       | Normative references   |
| 3       | Terms and definitions  |
| 4       | Design strategy for fire safety of structures  |
| 4.1     | General design process for fire safety of structures   |
| 4.2     | Practical design process guidance for fire safety of structures  |
| 5       | Quantification of the performance of structures in fire  |
| 5.1     | Scope of the project for fire safety of structures   |
| 5.1.1   | Built-environment characteristics  |
| 5.1.2   | Fuel loads   |
| 5.1.3   | Mechanical actions   |
| 5.2     | Identifying objectives, functional requirements and performance criteria for fire safety of structures |
| 5.2.1   | Objectives and functional requirements for fire safety of structures                                   |
| 5.2.2   | Performance criteria for fire safety of structures   |
| 5.2.2.1 | Performance criteria to limit fire spread (compartmentation)   |
| 5.2.2.2 | Performance criteria to limit structural damage (structural stability)                                 |
| 5.3     | Trial design plan for fire safety of structures  |
| 5.4     | Design fire scenarios and design fires (thermal actions)   |
| 5.4.1   | General  |
| 5.4.2   | Design fire scenarios  |
| 5.4.3   | Design fires (thermal actions)   |
| 5.5     | Thermal response of the structure  |
| 5.6     | Mechanical response of the structure   |
| 5.7     | Assessment against the fire safety objectives  |
| 5.8     | Documentation of the design for fire safety of structures  |
| 5.9     | Factors and influences to be considered in the quantification process                                  |
| 5.9.1   | Material properties  |
| 5.9.1.1 | Thermal properties   |
| 5.9.1.2 | Mechanical properties  |
| 5.9.1.3 | Uncertainty of material properties   |
| 5.9.2   | Effect of continuity and restraint (interaction between elements and materials)                        |
| 5.9.3   | Use of test results  |
| 5.9.4   | Fire spread routes   |
| 6       | Guidance on use of engineering methods   |
| 6.1     | General  |
| 6.2     | Using calculation methods  |
| 6.3     | Using experimental methods   |
| 6.4     | Using engineering judgment   |
