ISO 19112:2019 (E)

Geographic information — Spatial referencing by geographic identifiers

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms, definitions and notation

3.1 Terms and definitions
3.2 Conceptual schema notation

4 Conformance

4.1 General
4.2 Spatial reference system using geographic identifiers conformance class
4.3 Gazetteer conformance class

5 Conceptual schema overview

6 Requirements for spatial reference systems using geographic identifiers

6.1 Spatial reference system using geographic identifiers
6.2 Conceptual schema for spatial referencing using geographic identifiers
6.3 Object Type: SpatialReferenceSystemUsingGeographicIdentifiers
6.4 Object Type: LocationClass

7 Requirements for a gazetteer

7.1 Overview
7.2 Conceptual schema for gazetteers
7.3 Object Type: Gazetteer
7.4 Object Type: Location
7.5 Object Type: GeographicIdentifier

Annex A (normative) Abstract test suites

A.1 Spatial reference system using geographic identifiers
A.2 Gazetteer
A.2.1 Gazetteer schema
A.2.2 Gazetteer management

Annex B (informative) Example spatial reference systems using geographic identifiers

B.1 UK street addressing
B.2 Denmark road network

Annex C (informative) Examples of gazetteer data

Annex D (informative) Backward compatibility

D.1 Overview
D.2 Spatial reference system using geographic identifiers
D.3 Location Class
D.4 Gazetteer
D.5 Location
