ISO 13315-6:2019 (E)

Environmental management for concrete and concrete structures — Part 6: Use of concrete structures

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Symbols

5 Principles and procedures for environmental management related to maintenance/remedial activities of concrete structures

- 5.1 General
- 5.2 Maintenance of concrete structures
- 5.3 Remedial activities for concrete structures
- 5.3.1 General
- 5.3.2 Client briefing
- 5.3.3 Setting of environmental performance requirements
- 5.3.3.1 Selection of impact categories
- 5.3.3.2 Setting of indicators
- 5.3.3.3 Setting of environmental performance requirements for indicators
- 5.3.4 Design
- 5.3.5 Estimation
- 5.3.6 Verification
- 5.3.7 Execution and related works
- 5.3.8 Inspection
- 5.3.9 Documentation

6 Principles and procedures for environmental management during operation of concrete structures

- 6.1 General
- 6.2 Client briefing
- 6.3 Setting of environmental performance requirements
- 6.3.1 Selection of impact categories
- 6.3.2 Setting of indicators
- 6.3.3 Setting of environmental performance requirements for indicators
- 6.4 Design
- 6.4.1 New concrete structures
- 6.4.2 Existing concrete structures
- 6.5 Estimation
- 6.5.1 New concrete structures
- 6.5.2 Existing concrete structures
- 6.6 Verification
- 6.7 Execution and related works
- 6.8 Inspection
- 6.9 Documentation

Annex A (informative) Example of indicators for the environmental management

Annex B (informative) Examples of environmental consideration during operation

Annex C (informative) Example of environmental design of concrete structures during operation (Use of void slabs)

C.1 Assumption
C.2 Client briefing
C.3 Setting of environmental performance requirements
C.3.1 Selection of impact categories
C.3.2 Setting of indicators
C.3.3 Setting of requirements for indicators
C.4 Design
C.5 Estimation
C.6 Verification
C.7 Execution and related works
C.8 Inspection
C.9 Documentation

Annex D (informative) Example of environmental retrofitting using concrete masonry unit

D.1 Assumption
D.2 Client briefing
D.3 Setting of environmental performance requirements
D.3.1 Selection of impact categories
D.3.2 Setting of indicators
D.3.3 Setting of requirements for indicators
D.4 Design
D.5 Estimation
D.6 Verification
D.7 Execution and related works of remedial activities (see 5.3.7)
D.8 Execution and related works during operation (see 6.7)
D.9 Inspection
D.10 Documentation
