# DIN EN 1090-5:2020-06 (E)

## Execution of steel structures and aluminium structures - Part 5 : Technical requirements for cold-formed structural aluminium elements and cold- formed structures for roof, ceiling, floor and wall applications

## Contents

Page

European foreword ..... 6

1 Scope ..... 7

2 Normative references ..... 8

3 Terms, definitions, symbols and abbreviations ..... 9
3.1 Terms, definitions ..... 9
3.2 Symbols and abbreviations ..... 11

4 Specifications and documentation ..... 12
4.1 Execution Specification ..... 12
4.1.1 General ..... 12
4.1.2 Execution classes ..... 13
4.1.3 Layout drawings ..... 13
4.1.4 Geometrical tolerances ..... 14
4.2 Installer's documentation ..... 14
4.2.1 General ..... 14
4.2.2 Quality documentation ..... 14
4.2.3 Safety of the erection works ..... 15
4.3 Detailed traceability documentation ..... 15
4.4 Execution documentation ..... 15

5 Constituent products ..... 15
5.1 General ..... 15
5.2 Identification, inspection documents and traceability ..... 15
5.3 Materials ..... 16
5.4 Thickness tolerances ..... 17
5.5 Minimum nominal sheet thicknesses ..... 17
5.5.1 Profiled sheets ..... 17
5.5.2 Linear structural elements ..... 17
5.6 Geometrical tolerances ..... 17
5.7 Mechanical fasteners ..... 17
5.7.1 General ..... 17
5.7.2 Materials ..... 18
5.7.3 Verification of suitability ..... 18
5.8 Accessories ..... 18
5.9 Surface protection ..... 18
5.10 External fire performance for roofing elements ..... 18
5.10.1 Products deemed to satisfy the requirements for external fire performance ..... 18
5.10.2 Products classified without the need for further testing (CWFT option) ..... 19
5.10.3 Other products ..... 19
5.11 Reaction to fire ..... 19
5.12 Resistance to fire ..... 19
5.13 Release of dangerous substances ..... 19
5.14 Lightning protection ..... 19

6 Manufacturing ..... 19
6.1 General ..... 19

6.2 Identification ..... 19
6.3 Cold forming ..... 19
6.4 Cutting ..... 20
6.5 Punching ..... 20

7 Welding at the construction site ..... 20

8 Mechanical Fastening ..... 20
8.1 General ..... 20
8.2 Use of self-tapping and self-drilling screws ..... 21
8.3 Use of blind rivets ..... 22
8.4 Attachment of cold formed structural elements to the supporting member ..... 22
8.4.1 Types of connections and attachments ..... 22
8.4.2 Attachment of profiled sheets to the supporting member transverse to the direction of span ..... 22
8.4.3 Attachment of profiled sheets to the supporting member parallel to the direction of span 24
8.4.4 Supporting member made of metal ..... 24
8.4.5 Supporting member made of timber or other wood-based materials ..... 24
8.4.6 Supporting member made of concrete or masonry ..... 25
8.5 Connecting profiled sheets ..... 25
8.6 Edge and field spacings of fasteners for structural elements ..... 26
8.6.1 General ..... 26
8.6.2 Edge spacings of webs of trapezoidal sheeting and liner tray profiles ..... 26

9 Erection ..... 26
9.1 General ..... 26
9.2 Site conditions ..... 26
9.3 Training / instruction of installation personnel ..... 27
9.4 Inspection of preceding works ..... 27
9.5 Layout drawing ..... 27
9.6 Tools required ..... 27
9.7 Safety on site ..... 27
9.8 Inspection of packaging and contents ..... 28
9.9 Storage ..... 28
9.10 Damaged structural elements and connecting devices ..... 28
9.11 Unloading, lifting gear / slings / straps ..... 28
9.12 Laying ..... 28
9.13 Direction of lay of structural aluminium components ..... 29
9.14 Maintaining the cover width / adherence to tolerances ..... 29
9.15 Condition after installation (swarf from drilling, fouling of surface, protective film wrap) . 29
9.16 Inspection after installation ..... 29
9.17 Diaphragms and moment-resisting connections in the envelope ..... 29
9.18 Protection against lightning ..... 30

10 Surface protection ..... 30
10.1 Corrosion protection ..... 30
10.2 Cleaning and maintenance ..... 30

11 Geometrical tolerances ..... 31
11.1 General ..... 31
11.2 Tolerance types ..... 31
11.3 Essential tolerances ..... 32
11.3.1 General ..... 32
11.3.2 Manufacturing tolerances ..... 32
11.3.3 Erection tolerances ..... 32
11.4 Functional tolerances ..... 32
11.4.1 General ..... 32
11.4.2 Tabulated values ..... 32

12 Inspection, testing and correction ..... 32
12.1 General ..... 32
12.2 Structural elements ..... 33

12.2.1 General ....33
12.2.2 Non-conforming products ....33
12.3 Manufacturing: geometrical dimensions of manufactured structural elements ....33
12.3.1 General ....33
12.3.2 Profiled sheets ....33
12.4 Welding at the construction site ....34
12.5 Inspection of fastening ....34
12.5.1 Self-tapping and self-drilling screws ....34
12.5.2 Blind rivets ....34

Annex A(normative)Basic requirements for profiled sheeting ....35

A.1 General ....35
A.2 Supporting members ....35
A.3 Edges of laying area ....35
A.3.1 Longitudinal edge stiffeners ....35
A.3.2 Weakening of the cross section ....36
A.3.3 Avoidance of ice damming ....36
A.4 Building physics requirements ....37
A.4.1 General ....37
A.4.2 Water permeability ....37
A.4.3 Thermal insulation ....37
A.4.4 Avoidance of condensation ....37
A.4.4.1 General ....37
A.4.4.2 Measures against convection ....37
A.4.5 Airborne sound insulation ....38
A.4.6 Sound absorption ....38
A.4.7 Protection against lightning ....38
A.5 Roof drainage ....38

Annex B (normative)Additional design requirements for profiled sheeting ....40

B.1 General ....40
B.2 Serviceability ....40
B.3 Dimensions, widths of supports ....40
B.3.1 General ....40
B.3.2 Supporting members made of metal (steel / aluminium) ....41
B.3.3 Supporting members made of timber ....41
B.3.4 Supports made of concrete or masonry ....41
B.3.5 Shear forces / fixed points ....43
B.4 Eccentric attachments ....43
B.5 Stiffening of liner trays ....44
B.6 Walkability ....45
B.6.1 Walkability during installation ....45
B.6.2 Walkability and access after installation ....45
B.6.3 Test "Walkability" ....45
B.7 Rotational restraint ....47
B.8 Stressed skin design (diaphragms) ....47
B.9 Cantilevers ....47
B.10 Openings in laying areas ....48

Annex C(informative) Documentation ....51

Annex D(normative)Geometrical tolerances ....52

D.1 General ....52
D.2 Essential and functional manufacturing tolerances - Cold formed profiled sheets ....52

Annex E(normative)Galvanic corrosion ....55

Annex F(normative)Additional information ....56

**F.1 List of required additional information ..... 56**
**F.2 List of additional information if not otherwise specified ..... 56**

**Bibliography ..... 58**
