DIN EN 16303:2020-10 (E)

Road restraint systems - Validation and verification process for the use of virtual testing in crash testing against vehicle restraint system

Contents

Page

European foreword ... 5

Introduction ... 6

1 Scope ... 7

2 Normative references ... 7

3 Terms and definitions ... 7

4 Symbols and abbreviations ... 8

5 Requirements for numerical vehicle model ... 9
5.1 Modelling ... 9
5.2 General vehicle model behaviour assessment ... 10
5.3 Test methodology ... 10
5.4 Verification ... 13
5.5 Reporting ... 13

6 Requirements for numerical model of vehicle restraint system ... 13
6.1 Modelling ... 13
6.2 Validation and verification ... 14
6.3 Reporting ... 14

7 Requirements for numerical model of passive safety device ... 14
7.1 Modelling ... 14
7.2 Validation and verification ... 14
7.3 Reporting ... 14

8 Requirements for validation of virtual testing against test item ... 14
8.1 General ... 14
8.2 Test specifications ... 15
8.3 Comparison tables ... 17
8.4 Reporting ... 22

9 Requirements for verification of virtual testing against vehicle restraint systems and passive safety devices ... 23
9.1 General ... 23
9.2 Finite element model verification ... 23
9.3 Multi-body model verification ... 23
9.4 Standard report and output parameters ... 24

Annex A (normative) Virtual testing – Template for report ... 25

A.1 General ... 25

A.2 Verification and validation report ... 25

A.3 New performance report ... 34

Annex B (normative) Requirements for the entity (person/group) performing and verifying VT activities ... 42

Annex C (normative) Validation procedures of a vehicle for crash test analysis ... 44

C.1 General ... 44

C.2 Vehicle setup – Idle test (Test 1.1) ... 44

C.3 Vehicle suspension and steering kinematics **44**
C.4 Vehicle handling **46**
C.5 Vehicle crashworthiness - Test against rigidwall / rigid pole (Test 4.1 and 4.2) **46**
Annex D (informative) **Considerations on the modelling techniques of a vehicle** **47**
D.1 General **47**
D.2 General scheme of a vehicle **47**
D.3 Vehicle validation considerations **48**
D.4 Step by step development of a vehicle for crash test analysis **49**
Annex E (informative) **Recommendations and criteria for finite element vehicle models addressed to virtual testing** **50**
E.1 Components to be modelled **50**
E.2 Model organization **53**
E.3 General recommendations for the material of finite element vehicle models addressed to virtual testing **56**
E.4 General recommendations for the mesh of finite element vehicle models addressed to virtual testing **57**
Annex F (informative) **Recommendations and criteria for multi-body vehicle models addressed to virtual testing** **61**
F.1 Multi-body models **61**
F.2 General requirements **61**
F.3 Modelling requirements **61**
F.4 Model organization **62**
F.5 General recommendations for the material of multi-body-element vehicle models addressed to virtual crash test **74**
Annex G (informative) **Considerations on the modelling techniques of a vehicle restraint system** **75**
G.1 General **75**
G.2 Finite element and multi-body approaches **75**
G.3 Finite element guidelines **76**
G.4 Multi-body guidelines **76**
G.5 Step by step development of a vehicle restraint system **76**
G.6 Verification of the model **78**
Annex H (informative) **Recommendations and criteria for finite element vehicle restraint system models addressed to virtual testing** **80**
H.1 Material recommendations for finite element vehicle restraint system models addressed to virtual testing **80**
H.2 General recommendations for the mesh of finite element vehicle restraint system models addressed to virtual testing **80**
H.3 2D-mesh specifications **80**

H.4 Welding and connections **81**
H.5 3D-mesh specifications – Mesh features **81**
Annex I (informative) **Recommendations and criteria for multi-body vehicle restraint system models addressed to virtual crash testing** **82**
I.1 Introduction **82**
I.2 Welding and connections **82**
I.3 Model validation **82**
Annex J (informative) **Failure modes** **83**
Bibliography **85**
