ISO 13007-6:2020 (E)

Ceramic tiles — Grouts and adhesives — Part 6: Requirements, test methods, evaluation of conformity, classification and designation for waterproof membranes used with the installation of ceramic tiles

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Requirements

5 Classification and designation

6 Marking and labelling

Annex A (normative) Test methods

A.1 Sampling
A.1.1 Tile adhesive
A.1.2 Membrane
A.1.3 Other: membrane adhesive (if required), primer (if required), seam sealer (if required)
A.2 Test conditions
A.3 Test materials
A.3.1 General
A.3.1.1 Sheet waterproofing membrane
A.3.1.2 Membrane adhesive
A.3.1.3 Primer
A.3.1.4 Seam sealer
A.3.1.5 Tile adhesive
A.3.2 Ceramic tiles
A.3.3 Test substrate
A.3.3.1 Concrete slab
A.3.3.2 Other substrates (optional)
A.3.4 Ceramic tile adhesive
A.3.5 Sodium hypochlorite
A.4 Apparatus
A.4.1 Weight
A.4.2 Pull head plates
A.4.3 Machine for pull testing
A.4.4 Air-circulating oven
A.4.5 Equipment for water pressure permeability test
A.4.6 Machine for tensile testing
A.5 Application of bonded sheet waterproofing membrane
A.6 Adhesion tests
A.6.1 Preparation of test pieces
A.6.2 Initial adhesion
A.6.3 Adhesion strength after water contact
A.6.4 Alternative method for adhesion strength after water contact
A.6.5 Adhesion strength after heat ageing
A.6.6 Adhesion after freeze-thaw
A.6.7 Adhesion after contact with chlorinated water
A.6.8 Alternative method for adhesion after contact with chlorinated water
A.6.9 Adhesion after contact with lime water
A.6.10 Evaluation and expression of the results

A.7 Water permeability
A.8 Water vapour permeance
A.9 Test report
