European foreword 3

1 Scope 5

2 Normative references 5

3 Terms, definitions and types 5

4 Test sites and conditions 5
4.1 General 5
4.2 Test site design characteristics and location 5
4.3 Weather conditions 6
4.4 Traffic conditions 6
4.5 Road surface conditions 7

5 Organization of road trials 7
5.1 Duration 7
5.2 Longitudinal application patterns 7

6 Application of road studs 8
6.1 Technical specifications 8
6.2 Number of studs 8
6.3 Retroreflecting lens colour 8
6.4 Periods of application 8
6.5 Conditions suitable for application 9

7 Measurements related to performance 9
7.1 General 9
7.2 Stage 1: daylight examination 9
7.3 Stage 2: night-time examination 9
7.4 Stage 3: primary assessment 10
7.5 Stage 4: selection of test studs for photometric testing 10
7.6 Stage 5: testing selected test studs 10
7.6.1 General 10
7.6.2 Procedure 10
7.6.3 Night-time visibility measurement 11

8 Individual test report 11
8.1 Result classification 11
8.2 Minimum test report requirements 11

Annex A (informative) Example of road trial assessment form (RTAF) 12

Annex B (informative) Model of test report 15

Annex C (informative) Standardized documentation of weather conditions using the Köppen classification 17
