DIN EN 13031-1:2021-12 (E)

Greenhouses - Design and construction - Part 1: Commercial production greenhouses

Contents

Page

European foreword 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 8

4 Symbols and abbreviations 9

5 Basis of design for greenhouse structures 13
5.1 General 13
5.2 Classes of greenhouse structures 13
5.2.1 General 13
5.2.2 Tolerance to frame displacements of the cladding system 14
5.2.3 Design working life of the structure 14
5.3 Reliability of commercial production greenhouses 14
5.3.1 General classification, recommendations 14
5.3.2 Partial factors γ_F 15
5.3.3 Combination coefficients 15
5.3.4 Basis for actions on greenhouses 16

6 Ultimate limit states 16
6.1 General 16
6.2 Design calculations 17
6.3 Testing 17

7 Serviceability limit states 17
7.1 General 17
7.2 Design calculations 17
7.3 Testing 17

8 Tolerances 17
8.1 General 17
8.2 Tolerances specific to Type A greenhouses 21
8.3 Tolerances specific to Type B greenhouses 23

9 Durability, maintenance and repair 24
9.1 General 24
9.2 Durability 24
9.3 Maintenance and repair 24

10 Actions on greenhouses 24
10.1 General 24
10.2 Representative values of actions 25
10.2.1 Permanent actions 25
10.2.2 Variable actions 25
10.2.3 Accidental actions 29
10.3 Combination of actions 29

11 Displacements and deflections (SLS) 31
11.1 Displacements of Class A greenhouses 31

11.1.1 Displacements of connecting points of columns with foundations **31**
11.1.2 Displacements at gutter level **31**
11.1.3 Displacements of arches **35**
11.2 Deflections of Type A greenhouses **36**
11.2.1 General **36**
11.2.2 Deflections of components of a greenhouse **36**

Annex A (normative) **Structural capacity of glass panels** **38**
A.1 General **38**
A.2 Calculation method for glass panels **38**
A.3 Materials **41**

Annex B (normative) **Wind actions** **44**
B.1 General **44**
B.2 Aerodynamic coefficients **44**
B.2.1 General **44**
B.2.2 Greenhouses with pitched roofs **45**
B.2.3 Greenhouses with arched roofs **51**
B.2.4 Internal pressures **62**
B.2.5 Surface friction **63**
B.2.6 Ventilators **63**
B.2.7 Permeable cladding **63**
B.3 Dynamic coefficients for gust wind response **64**

Annex C (normative) **Snow actions** **65**
C.1 General **65**
C.2 Thermal coefficient C_t **67**
C.2.1 Requirements for heated greenhouses with controlled heating **67**
C.2.2 Special heat transmittance (U_o value according to ISO 4355) **67**
C.2.3 Calculation of the thermal coefficient C_t **69**
C.3 Special snow load shape coefficients for greenhouses **71**
C.3.1 General **71**
C.3.2 Pitched roofs of greenhouses **72**
C.3.3 Arched roofs of greenhouses **76**

Annex D (informative) **Ultimate limit states for arches** **78**
D.1 General **78**
D.2 Equivalent imperfections **78**
D.3 First order elastic and linear buckling (Euler buckling) **78**
D.4 Second order elastic **79**
D.5 Second order elastic-plastic **79**
D.6 Equivalent model for the behaviour of cross-sections of thin walled tubes **79**

Annex E (normative) **Earthquake** **81**
E.1 Classification **81**
E.2 Importance factors **81**
E.3 Earthquake return periods **82**
E.4 Seismic actions **82**

Annex F (normative) **Owner's manual and identification plate** **83**
F.1 General **83**
F.2 Owner's manual **83**
F.3 Identification plate **84**

Annex G (informative) **Instructions for maintenance and repair** **85**
G.1 General **85**
G.2 Access to the roof **85**

G.3 Glass stock and emergency repair kits **85**

Annex H (informative) **Structural details** **86**
H.1 General **86**
H.2 Forces due to temperature effects **86**
H.3 Contact forces between glass panels and cladding bars **86**
H.4 Rainwater capacities of gutters, gutter outlets and downpipes **87**
H.5 Aperture ratio **87**
H.6 Light interception ratio **89**

Annex I (informative) **Calculation method for film covered greenhouses** **91**
I.1 General **91**
I.2 Actions on film covered greenhouses **91**
I.3 Transmission of forces from the film to the supporting structure **91**
I.4 Verification of the film **94**

Bibliography **95**
