

DIN EN 13031-1:2021-12 (E)

Greenhouses - Design and construction - Part 1: Commercial production greenhouses

Contents		Page
European foreword		5
Introduction		6
1 Scope.....		7
2 Normative references.....		7
3 Terms and definitions		8
4 Symbols and abbreviations		9
5 Basis of design for greenhouse structures.....		13
5.1 General.....		13
5.2 Classes of greenhouse structures.....		13
5.2.1 General.....		13
5.2.2 Tolerance to frame displacements of the cladding system		14
5.2.3 Design working life of the structure		14
5.3 Reliability of commercial production greenhouses		14
5.3.1 General classification, recommendations.....		14
5.3.2 Partial factors γ_F		15
5.3.3 Combination coefficients		15
5.3.4 Basis for actions on greenhouses.....		16
6 Ultimate limit states.....		16
6.1 General.....		16
6.2 Design calculations.....		17
6.3 Testing		17
7 Serviceability limit states		17
7.1 General.....		17
7.2 Design calculations.....		17
7.3 Testing		17
8 Tolerances		17
8.1 General.....		17
8.2 Tolerances specific to Type A greenhouses.....		21
8.3 Tolerances specific to Type B greenhouses.....		23
9 Durability, maintenance and repair		24
9.1 General.....		24
9.2 Durability.....		24
9.3 Maintenance and repair		24
10 Actions on greenhouses.....		24
10.1 General.....		24
10.2 Representative values of actions.....		25
10.2.1 Permanent actions		25
10.2.2 Variable actions.....		25
10.2.3 Accidental actions.....		29
10.3 Combination of actions		29
11 Displacements and deflections (SLS).....		31
11.1 Displacements of Class A greenhouses		31

11.1.1	Displacements of connecting points of columns with foundations	31
11.1.2	Displacements at gutter level.....	31
11.1.3	Displacements of arches	35
11.2	Deflections of Type A greenhouses	36
11.2.1	General	36
11.2.2	Deflections of components of a greenhouse	36
Annex A	(normative) Structural capacity of glass panels	38
A.1	General	38
A.2	Calculation method for glass panels.....	38
A.3	Materials.....	41
Annex B	(normative) Wind actions	44
B.1	General	44
B.2	Aerodynamic coefficients	44
B.2.1	General	44
B.2.2	Greenhouses with pitched roofs	45
B.2.3	Greenhouses with arched roofs.....	51
B.2.4	Internal pressures.....	62
B.2.5	Surface friction	63
B.2.6	Ventilators.....	63
B.2.7	Permeable cladding	63
B.3	Dynamic coefficients for gust wind response.....	64
Annex C	(normative) Snow actions	65
C.1	General	65
C.2	Thermal coefficient C_t	67
C.2.1	Requirements for heated greenhouses with controlled heating	67
C.2.2	Special heat transmittance (U_o value according to ISO 4355)	67
C.2.3	Calculation of the thermal coefficient C_t	69
C.3	Special snow load shape coefficients for greenhouses	71
C.3.1	General	71
C.3.2	Pitched roofs of greenhouses.....	72
C.3.3	Arched roofs of greenhouses.....	76
Annex D	(informative) Ultimate limit states for arches.....	78
D.1	General	78
D.2	Equivalent imperfections	78
D.3	First order elastic and linear buckling (Euler buckling).....	78
D.4	Second order elastic	79
D.5	Second order elastic-plastic.....	79
D.6	Equivalent model for the behaviour of cross-sections of thin walled tubes	79
Annex E	(normative) Earthquake	81
E.1	Classification	81
E.2	Importance factors.....	81
E.3	Earthquake return periods	82
E.4	Seismic actions	82
Annex F	(normative) Owner's manual and identification plate	83
F.1	General	83
F.2	Owner's manual	83
F.3	Identification plate.....	84
Annex G	(informative) Instructions for maintenance and repair	85
G.1	General	85
G.2	Access to the roof.....	85

G.3	Glass stock and emergency repair kits	85
Annex H	(informative) Structural details.....	86
H.1	General.....	86
H.2	Forces due to temperature effects.....	86
H.3	Contact forces between glass panels and cladding bars.....	86
H.4	Rainwater capacities of gutters, gutter outlets and downpipes	87
H.5	Aperture ratio	87
H.6	Light interception ratio	89
Annex I	(informative) Calculation method for film covered greenhouses.....	91
I.1	General.....	91
I.2	Actions on film covered greenhouses.....	91
I.3	Transmission of forces from the film to the supporting structure	91
I.4	Verification of the film	94
Bibliography	95
