

DIN EN 12101-6:2022-11 (E)

Smoke and heat control systems - Part 6 : Specification for pressure differential systems - Kits

Contents		Page
European foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms, definitions, symbols and abbreviated terms	5
4	Characteristics	8
4.1	General	8
4.2	Nominal activation conditions/sensitivity	9
4.3	Response delay (response time)	10
4.4	Operational reliability	11
4.5	Effectiveness of smoke/hot gas extraction (air release/powered air release)	12
4.6	Performance parameters under fire conditions	13
4.7	Pressurization performance	13
4.8	Fire resistance - Integrity (E)	14
4.9	Fire resistance - Insulation (I)	15
4.10	Fire resistance - Smoke leakage (S)	16
4.11	Fire resistance - Mechanical stability	17
4.12	Fire resistance - Maintenance of cross section	17
4.13	Durability	18
5	Test methods	19
5.1	General	19
5.2	Nominal activation conditions/sensitivity	20
5.3	Response delay (response time)	21
5.4	Operational reliability	22
5.5	Effectiveness of smoke/hot gas extraction	32
5.6	Performance parameters under fire conditions	33
5.7	Pressurization performance	33
5.8	Fire resistance - Integrity (E)	34
5.9	Fire resistance - Insulation (I)	35
5.10	Fire resistance - Smoke leakage (S)	35
5.11	Fire resistance - Mechanical stability	36
5.12	Fire resistance - Maintenance of cross section	37
5.13	Durability	37
6	Verification of performance	38
6.1	Type testing	38
6.2	Factory production control (FPC)	40
7	Marking, labelling and packaging	44
Annex A (normative) Pressure differential kit types (pressurization)		45
Annex B (normative) Test method for hot gas control damper at elevated temperature		58

Annex C (normative) Test method for powered smoke and heat exhaust ventilators with frequency inverter and operated with variable speed at elevated temperature	62
Annex D (normative) Installation and maintenance document	64
Bibliography	65
