DIN EN 13286-47:2022-01 (E)

Unbound and hydraulically bound mixtures - Part 47: Test method for the determination of California bearing ratio, immediate bearing index and linear swelling

Contents

Page

European foreword 3

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Principle 6

5 Apparatus 6
5.1 Apparatus for specimen manufacture 6
5.2 Additional apparatus for soaking procedure and measurement of swelling 6
5.3 Additional apparatus for determination of the California bearing ratio and immediate bearing index 6

6 Test sample for the California bearing ratio and immediate bearing index tests 7

7 Specimen manufacture for the California bearing ratio and immediate bearing index tests 7

8 Curing for California bearing ratio test 7
8.1 General 7
8.2 Curing by prevention of evaporation 8
8.3 Curing that permits full soaking 8
8.4 Curing consisting of `prevention of evaporation' followed by soaking 9

9 Procedure for California bearing ratio and immediate bearing index determination 9

10 Calculation and expression of results 10

11 Test report 11

Annex A (normative) Different Types of Force-Penetration Curves 12

A.1 Convex Upward Force-Penetration Curve 12
A.2 Force-Penetration Curve with Inflexion Point S at X < 7,5 mm 13
A.3 Concave Upward Force-Penetration Curve with Inflexion Point S at X > 7,5 mm 14
