DIN EN 14437:2023-08 (E)

Determination of the uplift resistance of installed clay or concrete tiles for roofing - Roof system test method

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Symbols and abbreviations 6

5 Sampling 6

6 Test conditions 6

7 Test material 6

8 Apparatus 6
8.1 Test rig 6
8.2 Cables 7
8.3 Force measuring device 7
8.4 Monitoring device for displacement of the roofing tiles 7
8.5 Measuring device for weight 7

9 Test procedure 7
9.1 Measurement of the weight 7
9.2 Installation of battens, roofing tiles and fixings 7
9.3 Determination of the location of the forces on the test roof 8
9.4 Measurement of the uplift resistance 9
9.4.1 Calibration of the test equipment 9
9.4.2 Eliminate the effect of the load bars and cables 9
9.4.3 Trial test 9
9.4.4 Test series 9
9.4.5 Application of the force 9
9.4.6 Determining the maximum uplift resistance 10

10 Test report 11

Annex A (informative) Example of test rig 13

Annex B (normative) Specification of the arrangements of the tiles on the test rig and the arrangement of the tiles to be loaded 14

Annex C (informative) Examples of fixing patterns to be tested 17

Annex D (informative) Calculation of uplift resistance 23

Annex E (informative) Calculation of the uplift resistance of clay or concrete tiles for roofing at various roof pitches, for a tested configuration 28

Annex F (informative) Example of roof tiles for which the test method is not applicable 32

Annex G (informative) Test rig commissioning and periodic calibrations 33
