

DIN EN 14437:2023-08 (E)

Determination of the uplift resistance of installed clay or concrete tiles for roofing - Roof system test method

Contents		Page
European foreword		3
Introduction		4
1 Scope		5
2 Normative references		5
3 Terms and definitions		5
4 Symbols and abbreviations		6
5 Sampling		6
6 Test conditions		6
7 Test material		6
8 Apparatus		6
8.1 Test rig		6
8.2 Cables		7
8.3 Force measuring device		7
8.4 Monitoring device for displacement of the roofing tiles		7
8.5 Measuring device for weight		7
9 Test procedure		7
9.1 Measurement of the weight		7
9.2 Installation of battens, roofing tiles and fixings		7
9.3 Determination of the location of the forces on the test roof		8
9.4 Measurement of the uplift resistance		9
9.4.1 Calibration of the test equipment		9
9.4.2 Eliminate the effect of the load bars and cables		9
9.4.3 Trial test		9
9.4.4 Test series		9
9.4.5 Application of the force		9
9.4.6 Determining the maximum uplift resistance		10
10 Test report		11
Annex A (informative) Example of test rig		13
Annex B (normative) Specification of the arrangements of the tiles on the test rig and the arrangement of the tiles to be loaded		14
Annex C (informative) Examples of fixing patterns to be tested		17
Annex D (informative) Calculation of uplift resistance		23
Annex E (informative) Calculation of the uplift resistance of clay or concrete tiles for roofing at various roof pitches, for a tested configuration		28
Annex F (informative) Example of roof tiles for which the test method is not applicable		32
Annex G (informative) Test rig commissioning and periodic calibrations		33
