Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2
3.1 Terms relating to construction works and construction products 2
3.2 Terms relating to performance 5
3.3 Terms relating to life cycle approaches 7
3.4 Terms relating to resources and materials 11
3.5 Miscellaneous terms 12

4 Principles and application 13

5 The object of assessment 13
5.1 General 13
5.1.1 Perspectives on a building 13
5.1.2 A building as a place in which to live, work or socialize 14
5.1.3 A building as a part of the built environment 14
5.1.4 A building as an end-use product and an integrated assembly of products 14
5.1.5 A building as an economic asset 15
5.1.6 A building as a project to be managed from its inception to end-of-life 15
5.1.7 A building as a system in operation 16
5.1.8 A place for shelter and protection of contents 16
5.1.9 A building as an object that embodies cultural value 16
5.1.10 A building as either an enduring or short-term asset 16
5.2 System boundary 18
5.3 Functional equivalent 18
5.4 The building life cycle 19
5.4.1 General 19
5.4.2 The use of modules in the building assessment 20
5.4.3 The life cycle of building components 24
5.5 Relevance of local contexts 25

6 Framework for methods of assessment 26
6.1 General 26
6.2 Assessment method documentation 26
6.3 Purpose of assessment 27
6.4 Statement of assumptions and scenarios 27
6.5 The structured list of issues related to the areas of concern included in the assessment 27
6.5.1 Environmental issues 27
6.5.2 Social issues 29
6.5.3 Economic issues 36
6.5.4 Issues related to the management processes for construction, delivery, operation and maintenance 39
6.5.5 Additional issues 41

7 Methodsforquantification 41
7.1 General 41
7.2 Information for the assessment 42
7.2.1 Sources 42
7.2.2 Quality 43
7.3 Traceability and transparency 43
7.4 Multi-effects and double counting 43
7.5 Using performance levels 43
7.6 Weighting and aggregation 44

8 Evaluation of assessment results 45
8.1 General 45
8.2 Comparability of the results 45

9 Assessment report 46

Annex A (informative) Extent and application of the assessment method 48

Annex B (informative) Responsible sourcing 50

Annex C (informative) Stakeholder involvement 52

Annex D (informative) Potential multi-effects of indicators 53

Bibliography 56
