Sustainability in buildings and civil engineering works - Framework for methods of assessment of the environmental, social and economic performance of construction works as a basis for sustainability assessment - Part 1: Buildings

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
3.1	Terms relating to construction works and construction products	2
3.2	Terms relating to performance	5
3.3	Terms relating to life cycle approaches	7
3.4	Terms relating to resources and materials	11
3.5	Miscellaneous terms	12
4	Principles and application	13
5	The object of assessment	13
5.1	General	13
5.1.1	Perspectives on a building	13
5.1.2	A building as a place in which to live, work or socialize	14
5.1.3	A building as a part of the built environment	14
5.1.4	A building as an end-use product and an integrated assembly of products	14
5.1.5	A building as an economic asset	15
5.1.6	A building as a project to be managed from its inception to end-of-life	15
5.1.7	A building as a system in operation	16
5.1.8	A place for shelter and protection of contents	16
5.1.9	A building as an object that embodies cultural value	16
5.1.10	A building as either an enduring or short-term asset	16
5.2	System boundary	18
5.3	Functional equivalent	18
5.4	The building life cycle	19
5.4.1	General	19
5.4.2	The use of modules in the building assessment	20
5.4.3	The life cycle of building components	24
5.5	Relevance of local contexts	25
6	Framework for methods of assessment	26
6.1	General	26
6.2	Assessment method documentation	26
6.3	Purpose of assessment	27
6.4	Statement of assumptions and scenarios	27
6.5	The structured list of issues related to the areas of concern included in the assessment	27
6.5.1	Environmental issues	27
6.5.2	Social issues	29
6.5.3	Economic issues	36
6.5.4	Issues related to the management processes for construction, delivery, operation and maintenance	39
6.5.5	Additional issues	41

7	Methodsforquantification	41
7.1	General	41
7.2	Information for the assessment	42
7.2.1	Sources	42
7.2.2	Quality	43
7.3	Traceability and transparency	43
7.4	Multi-effects and double counting	43
7.5	Using performance levels	43
7.6	Weighting and aggregation	44
8	Evaluation of assessment results	45
8.1	General	45
8.2	Comparability of the results	45
9	Assessment report	46
Annex A (informative) Extent and application of the assessment method		48
Annex B (informative) Responsible sourcing		50
Annex C (informative) Stakeholder involvement		52
Annex D (informative) Potential multi-effects of indicators		53
Bibliography		56
