DIN EN 12390-19:2023-07 (E)

Testing of hardened concrete - Part 19: Determination of electrical resistivity

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms, definitions and symbols 5
3.1 Terms and definitions 5
3.2 Symbols 7

4 Principle 7

5 Apparatus 8
5.1 Resistivity meter 8
5.2 Data logger 9
5.3 Electrodes 9
5.4 Sponges 9
5.5 Wetting liquid at the sponge/concrete interface 10

6 Preparation of test specimens 10
6.1 Minimum number of specimens/readings to obtain a test result for a concrete 10
6.2 Test specimen preparation 11

7 Test procedure volumetric method (reference method) 11
7.1 Determination of the volumetric resistance 11
7.2 Two-electrode arrangement 13

8 Test procedure surface method 13
8.1 Measurements 13
8.2 Calculation of resistivity 15
8.2.1 General 15
8.2.2 Volumetric method 15
8.2.3 Surface method 15

9 Test report 16

10 Precision 17

Annex A (informative) Determination of the precision of the equipment 18
