DIN EN 15434-1:2023-06 (E)

Bonding sealants - Part 1: Bonded glazing sealants for direct light exposure

Contents

Page

European foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Apparatus and substrates 7
4.1 Substrate 7
4.2 Spacers 7
4.3 Anti-adherent substrate 7
4.4 Tensile test machine 7
4.5 Separator and clamps 7
4.6 Oven 8
4.7 Conditioning chambers 8
4.8 Container 8
4.9 Artificial light source 8

5 Requirements sealant 8
5.1 General 8
5.2 Identification 9
5.2.1 Description 9
5.2.2 General 9
5.2.3 Thermogravimetric analysis 9
5.2.4 Density 10
5.2.5 Hardness 10
5.2.6 Change in volume or shrinkage 10
5.2.7 Elastic modulus of the sealant 10
5.2.8 Elastic recovery 10
5.2.9 Water vapour transmission and gas transmission rate 11
5.3 Mechanical characteristics 11
5.3.1 General 11
5.3.2 Initial dynamic tensile load 11
5.3.3 Initial Dynamic Shear 12
5.3.4 Resistance to tearing 14
5.3.5 Fatigue test: dynamic tension cyclic load 16
5.3.6 Creep under simultaneous long term shear and tensile loading 17
5.3.7 Exposure to water with and without artificial light 19
5.3.8 Residual mechanical strength under additional artificial aging conditions 22
5.4 Compatibility with adjacent material 23
5.4.1 General 23
5.4.2 Method without UV 23
5.4.3 Method with UV 24

6 Reaction to fire 26

7 Evaluation of conformity 27
7.1 Requirements 27
7.1.1 Product description 27
7.1.2 Conformity with the definition of sealant 27
7.1.3 Determination of the characteristic's performances 27

Annex A (normative) Test sample description for testing mechanical characteristics 31

Annex B (informative) Evaluation of mechanical test results 32

B.1 Evaluation of the characteristic values Ru,5 32

Annex C (informative) Carrying out and evaluating the creep test 33

C.1 Description of testing device 33
C.2 Procedure 33
