ISO 21928-2:2023-04 (E)

Sustainability in buildings and civil engineering works - Sustainability indicators - Part 2: Framework for the development of indicators for civil engineering works

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 General rules for sustainability indicators development and its framework 8
4.1 General 8
4.2 Life cycle approach 9
4.3 Area of influence 10
4.4 Civil engineering works typologies 11
4.5 General principles and relationship to other relevant standards 11
4.5.1 General principles and procedures 11
4.5.2 ISO 15392 -- General principles of sustainability in building construction 12
4.5.3 ISO 14000 -- Management systems standards 12
4.5.4 ISO 26000 -- Social responsibility standard 12
4.6 Requirements for the development of indicators 13
4.7 Framework of sustainability indicators 14
4.7.1 General 14
4.7.2 Issues for the development of environmental indicators 15
4.7.3 Issues for the development of social indicators 16
4.7.4 Issues for the development of economic indicators 17

5 Set of aspects and impacts 17
5.1 General 17
5.2 Description of environmental aspects and impacts 18
5.2.1 General 18
5.2.2 Water management 18
5.2.3 Energy management 20
5.2.4 Material management 21
5.2.5 Waste management 22
5.2.6 Emissions to environment (air, water and soil) 22
5.2.7 Noise, vibrations and light impacts 26
5.2.8 Landscape changes 26
5.2.9 Ecosystem health 27
5.2.10 Land use changes 28
5.3 Description of social aspects and impacts 29
5.3.1 General 29
5.3.2 Accessibility 29
5.3.3 Adaptability 31
5.3.4 Population system 32
5.3.5 Job creation 32
5.3.6 Cultural heritage 33
5.3.7 Stakeholders' involvement 34
5.3.8 Human rights 35
5.3.9 Resilience 35
5.3.10 Health and comfort 43

5.3.11 Impacts on the neighbourhood 45
5.3.12 Maintenance and maintainability 49
5.3.13 Safety/security 49
5.3.14 Sourcing of materials and services 50
5.3.15 Social equity 51
5.4 Description of economic aspects and impacts 51
5.4.1 General 51
5.4.2 Life-cycle costs 51
5.4.3 External costs 52
5.4.4 Effects on local economy 52
5.4.5 Sustainable funding 53
5.4.6 Social internal rate of return 53
5.4.7 Management mechanisms 53

6 Development of a system of sustainability indicators 53
6.1 General 53
6.2 Rules for developing a system of indicators 54
6.3 Usability of sustainability indicators 55
6.4 Users of indicators 56

7 Reporting and communication 57
7.1 General 57
7.2 Information on the report 57
7.3 Statement of boundaries, scenarios used and additional functions considered in the assessment 58
7.4 Data sources 58
7.5 Communication of assessment results 58
7.5.1 General 58
7.5.2 Simplifications and additional remarks 59

Annex A (normative) Core indicators by civil engineering works (CEW) typology 60

Annex B (informative) Cost and revenue categories 72

Annex C (informative) Evaluation of risks 77

Annex D (informative) Relation between the sustainability indicators in this document and the UN Sustainable Development Goals 79

Annex E (informative) Example of utilization of indicators for decision support in the selection of alternatives in civil engineering projects 82

Bibliography 84
