DIN EN 13501-2:2023-12 (E)

Fire classification of construction products and building elements - Part 2: Classification using data from fire resistance and/or smoke control tests, excluding ventilation services

Contents

Page

European foreword 5

Introduction 7

1 Scope 8

2 Normative references 9

3 Terms and definitions 12

4 Fire scenarios 15
4.1 General 15
4.2 The standard temperature/time curve (post flash-over fire) 16
4.3 The slow heating curve (smouldering fire) 16
4.4 The `semi-natural' fire 16
4.5 The external fire exposure curve 17
4.6 Constant temperature attack 17

5 Resistance to fire performance characteristics 17
5.1 General 17
5.2 Performance characteristics 18
5.2.1 R - Loadbearing capacity 18
5.2.2 E - Integrity 18
5.2.3 I - Thermal insulation 19
5.2.4 W - Radiation 21
5.2.5 M - Mechanical action 21
5.2.6 C - Self-closing and durability of self-closing 21
5.2.7 S - Smoke control 22
5.2.8 O - Normal operating conditions 22
5.2.9 G - `Soot fire' resistance 22
5.2.10 K - Fire protection ability 23

6 Classification of characteristics related to fire resistance performance 23
6.1 Classification periods 23
6.2 Designatory letters 23
6.3 Declaration of classification 23
6.4 Combinations of classes 24
6.5 Particular classifications 24
6.5.1 Doorsets, shutter assemblies and openable windows 24
6.5.2 Conveyor systems and their closures 25
6.6 Additional performance parameters 25
6.6.1 Optional performance parameters 25
6.6.2 Expansion of performance parameters 25
6.6.3 Particular performance parameters 26
6.7 Presentation of classification 26
6.8 Declaration of fire resistance classes in product specifications 26

7 Classification procedure for fire resistance 26
7.1 General 26

7.1.1 Procedure ... 26
7.1.2 General rules for deducing the number of standard temperature/time fire resistance tests ... 28
7.1.3 Field of application ... 30
7.2 Classification of loadbearing elements without a fire separating function ... 30
7.2.1 General ... 30
7.2.2 Classification of loadbearing walls without separating function ... 30
7.2.3 Classification of loadbearing floors and roofs without fire separating function ... 31
7.2.4 Classification of beams ... 32
7.2.5 Classification of columns ... 33
7.2.6 Classification of balconies, walkways and stairs ... 34
7.3 Classification of loadbearing elements with fire separating function ... 35
7.3.1 General ... 35
7.3.2 Classification of loadbearing walls with fire separating function ... 36
7.3.3 Classification of loadbearing floors and roofs with fire separating function ... 38
7.3.4 Classification of raised floors ... 39
7.4 Products and systems for protecting elements or parts of works ... 41
7.4.1 General ... 41
7.4.2 Tests to be carried out ... 41
7.4.3 Test methods ... 42
7.4.4 Performance criteria ... 42
7.4.5 Classes ... 42
7.4.6 Classification of protected structural members ... 42
7.5 Classification of non-loadbearing elements ... 45
7.5.1 General ... 45
7.5.2 Partitions ... 46
7.5.3 Classification of facades (curtain walling) and external walls (including glazed elements) 47
7.5.4 Classification of ceilings with independent fire resistance ... 49
7.5.5 Classification of fire doorsets, shutter assemblies and openable windows including their closing devices ... 51
7.5.6 Classification of closure and conveyor system assemblies ... 54
7.5.7 Classification of penetration seals ... 56
7.5.8 Classification of linear joint seals ... 57
7.5.9 Classification of service ducts and shafts ... 59
7.5.10 Classification of chimneys ... 61
7.5.11 Classification of air transfer grilles ... 63
7.6 Classification of wall and ceiling coverings for fire protection ability ... 65
7.6.1 General ... 65
7.6.2 Test method ... 65
7.6.3 Tests to be carried out ... 65
7.6.4 Performance criteria for fire protection ability ... 66
7.6.5 Classes ... 67

Annex A (normative) Classification report ... 68

A.1 General ... 68
A.2 Content and format ... 68
A.3 Classification report format ... 69

Annex B (informative) Presentation of characterization data and their field of application for products and systems for protecting elements or parts of work ... 73

B.1 General ... 73
B.2 Characterization data for protective vertical membranes ... 73
B.3 Characterization data for applied protection to concrete members ... 74
B.4 Characterization data for applied protection to steelwork ... 75
B.5 Characterization data for applied protection to concrete/profiled sheet steel composite members ... 77
B.6 Characterization data for applied protection to concrete filled hollow steel columns ... 78
B.7 Characterization data for applied protection to timber members ... 79

Bibliography ... 86
