DIN EN 15287-1:2023-12 (E)

Chimneys - Design, installation and commissioning - Part 1: Chimneys and connecting flue pipes for non-room sealed combustion appliances

Contents

Page

European foreword 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 8

4 Design 16
4.1 General 16
4.2 Characteristics 16
4.2.1 Designation of an installed chimney 16
4.2.2 Temperature classes 16
4.2.3 Pressure classes 17
4.2.4 Condensate resistance classes 17
4.2.5 Corrosion resistance classes 18
4.2.6 Sootfire resistance classes 18
4.2.7 Minimum distance to combustible material 18
4.3 Required information 19
4.3.1 Sources of data and information 19
4.3.2 Local conditions 19
4.3.3 Combustion appliance information 19
4.3.4 Combustion air supply 19
4.3.5 Building structure and chimney route 19
4.3.6 Existing chimney 20
4.3.7 Chimney product specification 20
4.4 Design requirements 20
4.4.1 General 20
4.4.2 Route of the chimney and the connecting flue pipe 20
4.4.3 Designation classes 22
4.4.4 Materials of construction 23
4.4.5 Chimney sizing and characteristics 24
4.4.6 Installation requirements 24
4.4.7 Accessories 29
4.5 Chimney plate and additional information 32

5 Installation 33
5.1 General 33
5.2 Construction of relined chimneys 33
5.3 Chimney plate 33

6 Commissioning/handover 34

Annex A (informative) Terminology 35

Annex B (informative) List of combustion appliance data required for the design of a chimney 38
B.1 For choosing the chimney type (required chimney designation) 38

B.2 For calculation of the chimney (sizing, see 4.4.5) 38

B.3 For combustion appliance/connecting flue pipe/chimney adapter design/choice 38

Annex C (informative) Example of typical building structure designed to assist exchange of information 39

Annex D (informative) Location of chimney outlets 42

Annex E (informative) Correlation between the product designation of metal system chimneys, liners and connecting flue pipes and the corrosion loads in Member States (MS) 46

Annex F (informative) Correlation between type of flue liner according to the designation of parameters for clay/ceramic flue liners, clay/ceramic flue blocks and concrete flue blocks and the designation according to EN 1443 53

Annex G (informative) Example for chimney plates 55

Annex H (informative) Determination of the chimney designation for custom-built and relined chimneys 56

H.1 General 56
H.2 Temperature class 56
H.3 Pressure class 64
H.4 Condensate resistance class 65
H.5 Corrosion resistance class 65
H.6 Sootfire resistance class 65
H.7 Minimum distance to combustible material 66

Annex I (informative) Example for the determination of the designation of a relined chimney using a metal flue liner 67

I.1 Input data for a typical relined chimney 67
I.2 Temperature class 68
I.3 Pressure class 70
I.4 Condensate resistance class 70
I.5 Corrosion resistance class 70
I.6 Sootfire resistance class 70
I.7 Minimum distance to combustible material 70
I.8 Designation of the relined chimney 71
I.9 Chimney plate of the relined chimney in this example 71

Annex J (informative) Example for the determination of the designation of a custom-built chimney using a clay/ceramic flue liner 72

J.1 Input data for a custom-built chimney 72
J.2 Temperature class 72
J.3 Pressure class 74
J.4 Condensate resistance class 74
J.5 Corrosion resistance class 74
J.6 Sootfire resistance class 75
J.7 Minimum distance to combustible material 75
J.8 Designation of the custom-built chimney 75
J.9 Chimney plate for the custom-built chimney in this example 75

Annex K (informative) Minimum distances to combustible material 76

K.1 Connecting flue pipes without designation according to 4.2 76
K.2 Access components 76
K.3 Plastic flue liners in a chimney stack 77

Annex L (informative) Calculating the temperature of adjacent material 79

L.1 Example for calculation of the temperature of adjacent material (e.g. weatherproofing)79
L.2 Example for calculation of the temperature of adjacent materials (e.g. weatherproofing) 80

Annex M (informative) Useful hints for handling of materials and components on site 82

M.1 General 82
M.2 Check of existing chimney 82
M.3 Checking before installation 82
M.4 Checking on delivery of materials 82
M.5 Site handling and storage 82
M.6 Coordination of work 83

Annex N (informative) Chimney commissioning 84

N.1 General 84
N.2 Physical checks 84
N.3 Operational checks 85

Annex O (informative) Recommendations for inspection, cleaning and maintenance 88

O.1 General 88
O.2 Inspection and cleaning 88
O.3 Maintenance 88

Annex P (informative) Flue damper 89

P.1 General 89
P.2 Flue damper types 90
P.3 Additional information for the use of a flue damper type 2 and 4 92

Annex Q (informative) Terminals 94

Q.1 Terminal types 94
Q.2 Required information 94

Bibliography 96
