DIN EN 15287-2:2023-12 (E)

Chimneys - Design, installation and commissioning - Part 2: Chimneys and connecting flue pipes for room sealed combustion appliances

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Design 18
4.1 General 18
4.2 Characteristics 18
4.2.1 Designation of an installed chimney 18
4.2.2 Temperature classes 19
4.2.3 Pressure classes 19
4.2.4 Condensate resistance classes 19
4.2.5 Corrosion resistance classes 20
4.2.6 Sootfire resistance classes 20
4.2.7 Minimum distance to combustible material 20
4.3 Required information 21
4.3.1 Sources of data and information 21
4.3.2 Local conditions 21
4.3.3 Combustion appliance information 21
4.3.4 Building structure and chimney system route 21
4.3.5 Existing chimney 21
4.3.6 Chimney product specification 21
4.4 Design requirements 22
4.4.1 General 22
4.4.2 Route of the chimney and the connecting flue pipe 22
4.4.3 Designation classes 23
4.4.4 Materials of construction 25
4.4.5 Chimney system sizing and characteristics 26
4.4.6 Installation requirements 27
4.4.7 Accessories 32
4.5 Chimney plate and additional information 34

5 Installation 35
5.1 General 35
5.2 Construction of relined or converted chimney systems 35
5.3 Chimney plate 36

6 Commissioning/handover 36

Annex A (informative) Terminology 37

Annex B (informative) List of combustion appliance data required for the design of a chimney41

Annex C (informative) Example of typical building structure designed to assist exchange of information 43

Annex D (informative) Location of outlets of chimney systems 48

Annex E (informative) Correlation between the product designation of metal system chimneys, liners and connecting flue pipes and the corrosion loads in Member States (MS) 53

Annex F (informative) Correlation between type of flue liner according to the designation of parameters for clay/ceramic flue liners, clay/ceramic flue blocks and concrete flue blocks and the designation according to EN 1443 60

Annex G (informative) Example for chimney system plate 62

Annex H (informative) Determination of the chimney system designation for custom-built, relined and converted chimney systems with concentric air/flue configuration 64

Annex I (informative) Example for the determination of the designation of a converted or relined chimney system 76

Annex J (informative) Example for the determination of the designation of a custom-built chimney system 81

Annex K (informative) Minimum distances to combustible material 86

Annex L (informative) Calculating the temperature of adjacent material 89

Annex M (informative) Useful hints for handling of materials and components on site 93

Annex N (informative) Chimney system commissioning 95

Annex O (informative) Recommendations for inspection, cleaning and maintenance 100

Annex P (informative) Flue damper 101

Annex Q (informative) Terminals 106
