National foreword 3

National Annex NA (informative) **Bibliography** 4

Foreword 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 Symbols 8

5 Principle of the test 8

6 Description of the test equipment 9
6.1 Oven (for steps 1 and 3) 9
6.2 Spectrometer (for steps 1 and 3) 10
6.3 Switching control system (for steps 1 and 3) 10
6.4 Test chamber (for step 2) 10
6.5 Electrochromic cycling unit (for step 2) 13
6.6 Image capturing equipment (optional) 13

7 Test specimen 13
7.1 Description of the test specimen 13
7.2 Preparation of the test specimen 13

8 Initial optical characterization of the test sample (step 1) 14
8.1 General 14
8.2 Initial optical characterization of the electrochromic glazings at room temperature 14
8.3 Light transmittance measurement as a function of time at the selected test temperature 15

9 Cycling and radiation exposure of the test sample (step 2) 16
9.1 Mounting of the electrochromic glazings in the test chamber 16
9.2 Setting up the test chamber 16
9.3 Cycling the electrochromic glazings in the test chamber at elevated temperature and under simulated solar exposure 16
9.4 Interim visual and optical characterizations (optional) 17

10 Final optical characterization of the test sample (step 3) 17

11 Performance requirements 17
11.1 Visible light transmittance 17
11.2 Switching time difference 17
11.3 Other requirements 17

12 Observations 18

13 Test report 18
