

# DIN EN ISO 19123-1:2024-02 (E)

## Geographic information - Schema for coverage geometry and functions - Part 1: Fundamentals (ISO 19123-1:2023); English version EN ISO 19123-1:2023

---

| Contents                                                    | Page |
|-------------------------------------------------------------|------|
| <b>Foreword</b>                                             | v    |
| <b>Introduction</b>                                         | vii  |
| <b>1 Scope</b>                                              | 1    |
| <b>2 Normative references</b>                               | 1    |
| <b>3 Terms, definitions, abbreviated terms and notation</b> | 1    |
| 3.1 Terms and definitions                                   | 1    |
| 3.2 Abbreviated terms                                       | 8    |
| <b>4 Conformance</b>                                        | 8    |
| 4.1 Notation                                                | 8    |
| 4.2 Interoperability and conformance testing                | 9    |
| 4.3 Organization                                            | 9    |
| <b>5 Coverages</b>                                          | 10   |
| 5.1 Overview                                                | 10   |
| 5.2 Coverage packages                                       | 11   |
| 5.3 Probing coverages: evaluate() function                  | 12   |
| 5.4 Domain of a coverage                                    | 12   |
| 5.4.1 Concept                                               | 12   |
| 5.4.2 Coordinates                                           | 13   |
| 5.4.3 Mathematical versus physical coordinates              | 14   |
| 5.4.4 Coordinate reference systems and axes                 | 14   |
| 5.4.5 Coverage classification along topological dimensions  | 16   |
| 5.5 Range of a coverage                                     | 16   |
| 5.6 Interpolation                                           | 17   |
| 5.6.1 Concept                                               | 17   |
| 5.6.2 Discrete and continuous coverages                     | 18   |
| 5.7 Common point rule                                       | 19   |
| 5.8 Realization variants                                    | 19   |
| 5.8.1 Overview                                              | 19   |
| 5.8.2 Geometry/value pair view                              | 19   |
| 5.8.3 Domain/range view                                     | 20   |
| 5.8.4 Partitioned view                                      | 21   |
| 5.8.5 Functional view                                       | 21   |
| 5.9 Envelope                                                | 21   |
| <b>6 Multi-point coverages</b>                              | 22   |
| <b>7 Grid coverages</b>                                     | 23   |
| 7.1 Overview                                                | 23   |
| 7.2 Grids                                                   | 24   |
| 7.2.1 Grid definition                                       | 24   |
| 7.2.2 Grid axis types                                       | 27   |
| 7.3 Rectified and referenceable grid coverages              | 30   |
| 7.4 Grid cells                                              | 31   |
| 7.4.1 Grid cell concept                                     | 31   |
| 7.4.2 Pixel-in-centre, pixel-in-corner                      | 32   |
| 7.5 Grid coverage                                           | 32   |
| 7.6 Further grid coverage types                             | 33   |

|                                                                            |                                             |           |
|----------------------------------------------------------------------------|---------------------------------------------|-----------|
| <b>8</b>                                                                   | <b>Multi-curve coverages.....</b>           | <b>34</b> |
| 8.1                                                                        | Overview.....                               | 34        |
| 8.2                                                                        | General multi-curve coverages.....          | 35        |
| 8.3                                                                        | Segmented curve coverages .....             | 35        |
| <b>9</b>                                                                   | <b>Multi-surface coverages.....</b>         | <b>36</b> |
| 9.1                                                                        | Overview.....                               | 36        |
| 9.2                                                                        | General multi-surface coverages.....        | 36        |
| 9.3                                                                        | Further surface coverages .....             | 37        |
| 9.3.1                                                                      | General .....                               | 37        |
| 9.3.2                                                                      | Thiessen polygon coverages.....             | 37        |
| 9.3.3                                                                      | Triangulated irregular networks (TINs)..... | 38        |
| <b>10</b>                                                                  | <b>Multi-solid coverages.....</b>           | <b>39</b> |
| <b>Annex A (normative) Conformance tests.....</b>                          |                                             | <b>41</b> |
| <b>Annex B (informative) Interpolation methods.....</b>                    |                                             | <b>45</b> |
| <b>Annex C (informative) Sequential enumeration.....</b>                   |                                             | <b>49</b> |
| <b>Annex D (normative) Legacy data-centric coverage specification.....</b> |                                             | <b>60</b> |
| <b>Bibliography.....</b>                                                   |                                             | <b>77</b> |
