ISO 5091-4:2023-07 (E)

Structural intervention of existing concrete structures using cementitious materials - Part 4: Jacketing

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Investigation of existing structure 2
4.1 General 2
4.2 Investigation 2
4.2.1 Investigation using documents, records 2
4.2.2 On-site investigation 3

5 Intervention design 3
5.1 General 3
5.2 Structural plan 3
5.3 Structural details 3

6 Materials 4
6.1 General 4
6.2 Materials in existing structure 4
6.3 Materials used in repairing or strengthening parts 4
6.3.1 General 4
6.3.2 Cementitious materials 5
6.3.3 Reinforcing materials 6
6.3.4 Bonding products 6
6.3.5 Filling materials 7
6.4 Characteristic values and design values of materials 7
6.4.1 General 7
6.4.2 Cementitious materials 7
6.4.3 Reinforcing materials 7
6.4.4 Bonding products 7

7 Actions 7
7.1 General 7
7.2 Actions for intervention design 7

8 Performanceverificationforrepairedorstrengthenedstructure 7
8.1 General 7
8.2 Calculation of response values 8
8.2.1 General 8
8.2.2 Modelling of structure 8
8.2.3 Structural analysis 8
8.2.4 Calculation of response 8
8.3 Durability verification 8
8.4 Safety verification 8
8.4.1 General 8
8.4.2 Verification related to failure 9

8.5 Serviceability verification 10
8.5.1 General 10
8.5.2 Verification related to appearance 10
8.5.3 Verification related to vibration 10
8.5.4 Verification related to displacement and deformation 10
8.6 Seismic performance verification 10
8.7 Structural details 10
8.7.1 Arrangement of reinforcing materials and spacing of reinforcing steel 10
8.7.2 Covering and jacketing thickness of reinforcing materials 11
8.7.3 Joints for lateral reinforcing materials 11
8.7.4 Anchorage of longitudinal reinforcement to footings 11
8.7.5 Intermediate penetrating tie 11

9 Construction 11
9.1 General 11
9.2 Prior investigation and construction plan 12
9.3 Surface treatment 13
9.4 Assembly of reinforcing materials 13
9.5 Execution of concrete jacketing 14
9.6 Execution of mortar jacketing 14
9.6.1 Surface preparation 14
9.6.2 Storage, mixing and transportation of jacketing materials 14
9.6.3 Execution of mortar jacketing 14
9.6.4 Curing 14
9.7 Surface protection 15
9.8 Quality control 15
9.9 Inspection 15

10 Records 15

11 Maintenance 15

Annex A (informative) Examples of design and execution 16
