

# DIN EN ISO 6781-1:2023-11 (E)

## Performance of buildings - Detection of heat, air and moisture irregularities in buildings by infrared methods - Part 1: General procedures (ISO 6781-1:2023)

---

<b>Contents</b>		<b>Page</b>
<b>European foreword</b> .....		4
<b>Foreword</b> .....		5
<b>Introduction</b> .....		6
<b>1 Scope</b> .....		7
<b>2 Normative references</b> .....		7
<b>3 Terms and definitions</b> .....		7
3.1 General terms.....		8
3.2 Thermography terms.....		10
<b>4 Symbols and abbreviated terms</b> .....		13
<b>5 Example applications of use of thermography in building assessments</b> .....		14
<b>6 Customer preparation</b> .....		14
<b>7 Qualification of personnel</b> .....		15
7.1 Personnel — General guidance.....		15
7.2 Application specific requirements.....		16
7.2.1 Residential buildings — Qualification requirements.....		16
7.2.2 Commercial buildings — Qualification requirements.....		16
7.2.3 Institutional / Industrial buildings — Qualification requirements.....		16
<b>8 Equipment requirements for thermographic examination of residential, commercial and institutional buildings</b> .....		17
8.1 Equipment — General requirements.....		17
8.2 Calibration and checking of equipment.....		18
<b>9 Safety</b> .....		18
<b>10 Thermography techniques</b> .....		18
10.1 General.....		18
10.2 Comparative thermography.....		18
10.2.1 General.....		18
10.2.2 Technique.....		19
10.3 Comparative qualitative thermography.....		19
10.4 Comparative quantitative thermography.....		20
10.4.1 General.....		20
10.4.2 Comparative quantitative thermography — Limitations.....		20
<b>11 Non-contact infrared radiometry (spot radiometry) using infrared thermography cameras</b> .....		21
<b>12 Air leakage and mass transfer</b> .....		21
12.1 Air leakage.....		21
12.2 Mass transfer — Moisture.....		21
<b>13 Moisture detection</b> .....		22
13.1 Conductivity test method — Moisture detection.....		22
13.2 Capacitance test method — Moisture detection.....		22
13.3 Phase change test method — Moisture detection.....		22
<b>14 Baseline measurements for building maintenance and condition monitoring</b> .....		23

<b>15</b>	<b>Data collection</b> .....	<b>23</b>
<b>16</b>	<b>Field measurements of reflected temperature and emissivity, and attenuating media</b> .....	<b>24</b>
<b>17</b>	<b>Comparative assessment criteria — Severity</b> .....	<b>24</b>
<b>18</b>	<b>Diagnosis and prognosis</b> .....	<b>24</b>
	18.1 Survey intervals .....	24
	18.2 Image interpretation.....	24
	18.3 Fault identification process.....	25
<b>19</b>	<b>Test report</b> .....	<b>25</b>
	19.1 General information.....	25
	19.2 Building-specific information.....	26
	19.3 Qualitative inspections.....	27
	19.4 Quantitative inspections.....	27
	19.5 Reporting of unsafe conditions.....	28
	<b>Annex A (normative) Pro-forma safety rules and guidelines</b> .....	<b>29</b>
	<b>Annex B (normative) Field measurements of reflected apparent temperature and emissivity</b> .....	<b>30</b>
	<b>Annex C (informative) Examples of buildings heat, air and moisture faults, failures and anomalies detected by infrared thermography (IRT)</b> .....	<b>34</b>
