

DIN EN 17839:2024-01 (E)

Glass in building - Glazing and airborne sound insulation - Validation procedure for calculation tools

Contents		Page
European foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	Software validation procedure	6
4.1	General outline	6
4.2	Coverage of the validation	6
4.3	Requirements for the calculation tool	7
4.4	Step 1: validation using the reference values of Table A.1	7
4.4.1	Reference data	7
4.4.2	Comparison procedure	7
4.4.3	Validation criteria	8
4.5	Step 2: validation using values of random glass configurations	9
4.5.1	Reference data	9
4.5.2	Validation criteria	9
4.6	Step 3: validation of the limits of the calculation tool declared by applicant	9
4.6.1	General	9
4.6.2	Validation of the calculation tool outside of the ranges	10
4.6.3	Validation criteria	10
5	Revalidation	10
6	Validation report content	10
Annex A (normative) Reference data to be used for the validation process		12
A.1	Reference glazing units	12
A.1.1	General	12
A.1.2	Sound transmission loss for glazing references	12
Annex B (informative) Example of calculation results report		15
Annex C (informative) Example of validation in Step 1		16
