European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Abbreviations 8

5 Sample preparation 9

6 Principle 9

7 Reagents 9

8 Apparatus and equipment 11

9 Procedure 12
9.1 Preparation and storage of the samples 12
9.2 Preparation of eluates 12
9.3 Sample preparation for content analysis 13
9.4 Determination 14
9.5 Test for interference and recovery 14

10 Evaluation of results 14
10.1 Identification 14
10.2 Quantification 15
10.3 Quality assurance 15

11 Calculation of results 16
11.1 Calculation of biocide concentrations without standard addition 16
11.2 Calculation of biocide concentrations with standard addition 17

12 Test performance 20

13 Test report 21

Annex A (normative) LC-UV method for content analysis 22

A.1 Extraction and clean-up 22
A.2 HPLC analysis 22
A.3 Example of chromatographic conditions 22
A.4 Calibration 23
A.4.1 General 23
A.4.2 Calibration curve 23
A.5 Calculation of biocide content in the construction product 24

Annex B (informative) Solid phase extraction of eluates (example) 25

Annex C (informative) Example conditions for suitable LC-MS/MS systems 26

Annex D (informative) Validation results for biocides in eluates from construction products 31
