

# DIN EN 17845:2024-07 (E)

## Construction products: Assessment of release of dangerous substances - Determination of biocide residues using liquid chromatography with mass spectrometric detection (LC-MS/MS)

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
Introduction .....		5
1 Scope .....		6
2 Normative references .....		6
3 Terms and definitions .....		6
4 Abbreviations .....		8
5 Sample preparation .....		9
6 Principle .....		9
7 Reagents .....		9
8 Apparatus and equipment .....		11
9 Procedure .....		12
9.1 Preparation and storage of the samples .....		12
9.2 Preparation of eluates .....		12
9.3 Sample preparation for content analysis .....		13
9.4 Determination .....		14
9.5 Test for interference and recovery .....		14
10 Evaluation of results .....		14
10.1 Identification .....		14
10.2 Quantification .....		15
10.3 Quality assurance .....		15
11 Calculation of results .....		16
11.1 Calculation of biocide concentrations without standard addition .....		16
11.2 Calculation of biocide concentrations with standard addition .....		17
12 Test performance .....		20
13 Test report .....		21
Annex A (normative) LC-UV method for content analysis .....		22
A.1 Extraction and clean-up .....		22
A.2 HPLC analysis .....		22
A.3 Example of chromatographic conditions .....		22
A.4 Calibration .....		23
A.4.1 General .....		23
A.4.2 Calibration curve .....		23
A.5 Calculation of biocide content in the construction product .....		24
Annex B (informative) Solid phase extraction of eluates (example) .....		25
Annex C (informative) Example conditions for suitable LC-MS/MS systems .....		26
Annex D (informative) Validation results for biocides in eluates from construction products .....		31
