

DIN EN 17845:2024-07 (E)

Construction products: Assessment of release of dangerous substances - Determination of biocide residues using liquid chromatography with mass spectrometric detection (LC-MS/MS)

Contents	Page
European foreword	4
Introduction	5
1 Scope	6
2 Normative references	6
3 Terms and definitions	6
4 Abbreviations	8
5 Sample preparation	9
6 Principle	9
7 Reagents	9
8 Apparatus and equipment	11
9 Procedure	12
9.1 Preparation and storage of the samples	12
9.2 Preparation of eluates	12
9.3 Sample preparation for content analysis	13
9.4 Determination	14
9.5 Test for interference and recovery	14
10 Evaluation of results	14
10.1 Identification	14
10.2 Quantification	15
10.3 Quality assurance	15
11 Calculation of results	16
11.1 Calculation of biocide concentrations without standard addition	16
11.2 Calculation of biocide concentrations with standard addition	17
12 Test performance	20
13 Test report	21
Annex A (normative) LC-UV method for content analysis	22
A.1 Extraction and clean-up	22
A.2 HPLC analysis	22
A.3 Example of chromatographic conditions	22
A.4 Calibration	23
A.4.1 General	23
A.4.2 Calibration curve	23
A.5 Calculation of biocide content in the construction product	24
Annex B (informative) Solid phase extraction of eluates (example)	25
Annex C (informative) Example conditions for suitable LC-MS/MS systems	26
Annex D (informative) Validation results for biocides in eluates from construction products	31
Bibliography	33
