ISO 9869-3:2023-11 (E)

Thermal insulation of building elements - In-situ measurement of t hermal resistance and thermal transmittance - Part 3: Probe insertion method

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Symbols and units ... **2**

5 Principle ... **2**
5.1 General ... 2
5.2 Method without heat flow measurement ... 2
5.3 Method with heat flow measurement ... 2

6 Apparatus ... **3**
6.1 Temperature measuring devices ... 3
6.1.1 Type of sensors and accuracy ... 3
6.1.2 Sensor for measuring temperature distribution in walls ... 3
6.1.3 Sensors for measuring surface and air temperatures ... 4
6.2 Borescope ... 4
6.3 Heat flow meter (HFM) ... 5

7 Locations of the measured area and sensor installation ... **5**

8 Measurement conditions and period ... **7**
8.1 General ... 7
8.2 Method without heat flow measurement ... 7
8.3 Method with heat flow measurement ... 7

9 Measurement procedure ... **7**
9.1 General ... 7
9.2 Method without heat flow measurement ... 7
9.3 Method with heat flow measurement ... 8

10 Calculations ... **9**
10.1 Thickness of wall components ... 9
10.2 Temperature distribution ... 9
10.3 Thermal resistance ... 9

11 Test report ... **10**

Annex A (normative) **Evaluation of the effect of thermal bridges on the sensor for measuring the temperature distribution in the wall** ... **12**

Annex B (informative) **Uncertainty analysis** ... **18**

Bibliography ... **21**
