

ISO 9869-3:2023-11 (E)

Thermal insulation of building elements - In-situ measurement of thermal resistance and thermal transmittance - Part 3: Probe insertion method

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols and units	2
5	Principle	2
5.1	General	2
5.2	Method without heat flow measurement	2
5.3	Method with heat flow measurement	2
6	Apparatus	3
6.1	Temperature measuring devices	3
6.1.1	Type of sensors and accuracy	3
6.1.2	Sensor for measuring temperature distribution in walls	3
6.1.3	Sensors for measuring surface and air temperatures	4
6.2	Borescope	4
6.3	Heat flow meter (HFM)	5
7	Locations of the measured area and sensor installation	5
8	Measurement conditions and period	7
8.1	General	7
8.2	Method without heat flow measurement	7
8.3	Method with heat flow measurement	7
9	Measurement procedure	7
9.1	General	7
9.2	Method without heat flow measurement	7
9.3	Method with heat flow measurement	8
10	Calculations	9
10.1	Thickness of wall components	9
10.2	Temperature distribution	9
10.3	Thermal resistance	9
11	Test report	10
Annex A (normative)	Evaluation of the effect of thermal bridges on the sensor for measuring the temperature distribution in the wall	12
Annex B (informative)	Uncertainty analysis	18
