DIN EN 1993-1-13:2025-04 (E)

Eurocode 3 - Design of steel structures - Part 1-13: Beams with large web openings

Contents

Page

European foreword 4

0 Introduction 5

1 Scope 8

2 Normative references 10

3 Terms, definitions and symbols 11
3.1 Terms and definitions 11
3.2 List of symbols 12

4 Basis of design 17
4.1 General 17
4.2 Verifications 17
4.3 Methods of design for Vierendeel bending 18
4.3.1 Equivalent rectangular opening method 18
4.3.2 Alternative methods 18
4.4 Tolerances and manufacture 18

5 Materials 18
5.1 General 18
5.2 Welding 18

6 Durability 19

7 Structural Analysis 19
7.1 Methods of analysis 19
7.2 Member stiffness for global structural analysis 19
7.3 Serviceability 21
7.4 Classification for global bending 21
7.5 Section classification of Tees subject to Vierendeel bending 21
7.6 Section classification of longitudinal stiffeners 22

8 Ultimate Limit States 22
8.1 General Requirements for all openings 22
8.1.1 General 22
8.1.2 Geometric limits for unstiffened web openings 23
8.1.3 Geometric limits for web openings with stiffeners 23
8.2 Shear resistance at web opening positions 24
8.3 Bending resistance of a beam with web openings 25
8.3.1 General 25
8.3.2 Buckling resistance of the compressed Tee for long openings 25
8.4 Resistance of the Tee sections in Vierendeel bending 26
8.5 Web buckling next to widely spaced openings 28
8.5.1 General 28
8.5.2 Web buckling 29
8.6 Rules for closely spaced openings 30
8.6.1 General 30
8.6.2 Web-post bending 30
8.6.3 Web-post buckling 32
8.6.4 Web-post shear 33

8.7 Longitudinally stiffened openings 34
8.7.1 Scope of the rules for openings with longitudinal stiffeners 34
8.7.2 Additional verifications for stiffened openings 34
8.7.3 Global bending resistance for stiffened openings 34
8.7.4 Vierendeel bending resistance for stiffened openings 35
8.7.5 Web buckling for widely spaced stiffened openings 35
8.7.6 Web-post buckling for closely spaced stiffened openings 35
8.7.7 Openings with transverse stiffeners 36
8.8 Additional requirements for other cases 36
8.8.1 End-posts 36
8.8.2 Loads applied over or close to the openings 38
8.9 Alternative method for Vierendeel bending for circular openings 39
8.10 Alternative method for stability of web-post between circular openings 40
8.11 Alternative method for sinusoidal openings 43
8.11.1 General 43
8.11.2 Vierendeel bending 43
8.12 Lateral torsional buckling 44

9 Serviceability limit states 45
