| Foreword                     |   | iv          |
| Introduction                 |   | v           |
| <b>1</b>                     | <b>Scope</b>  | <b>1</b>    |
| <b>2</b>                     | <b>Normative references</b>   | <b>1</b>    |
| <b>3</b>                     | <b>Terms and definitions</b>  | <b>1</b>    |
| <b>4</b>                     | <b>Symbols and abbreviated terms</b>  | <b>5</b>    |
| <b>5</b>                     | <b>Measurement principle and technical realisations</b>   | <b>8</b>    |
| 5.1                          | General measurement principle   | 8           |
| 5.2                          | Technical realisation of sedimentation-based measurement techniques                                   | 10          |
| <b>6</b>                     | <b>Measurement data and basic rules of data evaluation</b>  | <b>13</b>   |
| 6.1                          | Sedimentation velocity distribution   | 13          |
| 6.2                          | Stokes-based analysis for obtaining particle size distributions                                       | 16          |
| 6.2.1                        | Particle size   | 16          |
| 6.2.2                        | Quantification of size fractions  | 17          |
| 6.3                          | Deviations from Stokes-based analysis   | 21          |
| 6.3.1                        | General   | 21          |
| 6.3.2                        | Upper limit for sedimentation velocity and particle size  | 22          |
| 6.3.3                        | Lower limits for particle size  | 22          |
| 6.3.4                        | Limits for particle concentration   | 23          |
| 6.3.5                        | Handling of porous and heterogeneous particles  | 23          |
| 6.3.6                        | Handling of non-spherical particles and particle agglomerates   | 23          |
| <b>7</b>                     | <b>Performing size analyses</b>   | <b>24</b>   |
| 7.1                          | General   | 24          |
| 7.2                          | Sampling  | 24          |
| 7.3                          | Dispersion process and primary sample preparation   | 24          |
| 7.4                          | Secondary sample preparation (sample conditioning)  | 25          |
| 7.5                          | Instrument preparation  | 26          |
| 7.6                          | Measurement   | 26          |
| 7.7                          | Data analysis   | 27          |
| 7.8                          | Reporting   | 27          |
| <b>8</b>                     | <b>System qualification and quality control</b>   | <b>29</b>   |
| 8.1                          | General remarks   | 29          |
| 8.2                          | Reference materials   | 29          |
| 8.3                          | Performance qualification   | 30          |
| 8.4                          | Sources of measurement uncertainty  | 32          |
| 8.5                          | Accuracy and measurement of uncertainty of particle velocity  | 32          |
| 8.6                          | Combined and expanded uncertainty of velocity measurement   | 34          |
| 8.7                          | Combined and expanded uncertainty of particle size (Stokes diameter)                                  | 35          |
| <b>Annex A</b> (informative) | <b>List of gravitational sedimentation-based particle sizing techniques</b>                           | <b>37</b>   |
| <b>Annex B</b> (informative) | <b>Remarks on particle density</b>  | <b>39</b>   |
| <b>Annex C</b> (informative) | <b>Sedimentation beyond the validity of Stokes' law</b>   | <b>45</b>   |
| <b>Annex D</b> (informative) | <b>Example for the determination of the uncertainty of velocity and particle size</b>                 | <b>53</b>   |
| <b>Annex E</b> (informative) | <b>Impact of the measurement zone width on the resolution of measured particle size distributions</b> | <b>62</b>   |
| <b>Bibliography</b>          |   | <b>65</b>   |
