DIN EN 17887-1:2024-11 (E)

Thermal performance of buildings - In situ testing of completed buildings - Part 1: Data collection for aggregate heat loss test

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms, definitions, symbols and units 7
3.1 Terms and definitions 7
3.2 Symbols and units 9

4 Principle 9

5 Requirements for test conditions and internal building conditions 10
5.1 Test conditions 10
5.2 Internal building conditions 11

6 Apparatus 11
6.1 Internal apparatus 11
6.1.1 Temperature sensors 11
6.1.2 Relative humidity sensors 11
6.1.3 Electric resistance fan heaters 12
6.1.4 Electric circulation fans 12
6.1.5 Temperature controllers 12
6.1.6 Energy meters 12
6.1.7 Datalogger(s) 12
6.1.8 Extension leads 12
6.2 External apparatus 12
6.2.1 Weather station including pyranometer 12
6.2.2 Datalogger 13
6.3 Sampling intervals 13

7 Uncertainty of measurement and calibration procedures 13
7.1 General 13
7.2 Calibration and maximum permissible error of sensors 13
7.2.1 General 13
7.2.2 Temperature sensors 13
7.2.3 Energy meters 13
7.2.4 Relative humidity (RH) sensors 13
7.2.5 Weather station 13
7.2.6 Pyranometer 14
7.2.7 PID controller 14

8 Preparation of the test building and installation and location of apparatus 14
8.1 General 14
8.2 Location and numbers of apparatus 14
8.2.1 General 14
8.2.2 Internal air temperature and relative humidity sensors 15
8.2.3 Electric resistance fan heaters 15
8.2.4 Electric air circulation fans 15

8.2.5 PID temperature controller 16
8.2.6 Energy meters 16
8.2.7 Data logger 16
8.2.8 Weather station and pyranometer 16
8.3 Minimizing other heat gain and heat loss mechanisms during the test 16
8.4 Establishing and maintaining stable mean internal temperature conditions 16

9 Optional measurements 17

10 Test procedure 17
10.1 Pre-test pressurization test 17
10.2 Heating 17
10.3 Test duration 18
10.4 Post-test pressurization test 18

11 Data collection 18
11.1 Recording data 18
11.2 Downloading data 18
11.3 Data verification 19
11.4 Downloading data 19

12 Test report 19
12.1 General 19
12.2 Data 19
12.2.1 Data on the measured building/ structure 19
12.2.2 Description of the experimental set-up 20
12.2.3 Conditions during measurement 20

Annex A (informative) Additional information for buildings with special considerations 21

A.1 Attached and multi-occupancy buildings 21
A.2 Buildings in lower European latitudes 21
A.3 Buildings with low or high thermal mass 21
A.4 Very large or poorly insulated buildings 22
A.5 Buildings with a large proportion of south-facing glazing area 22
A.6 Buildings with a low level of air permeability/air leakage rate 22
A.7 Tests undertaken outside the idealised test period 22

Annex B (informative) Test set up 24
