ISO 16311-1:2024-05 (E)

Maintenance and repair of concrete structures - P art 1: General principles

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Basis of maintenance and repair 4
4.1 General 4
4.2 Procedure of maintenance and repair 5
4.3 Competence of personnel 5

5 Maintenance plan 5
5.1 General 5
5.2 Timing of maintenance planning for structure 6
5.3 Maintenance category 6
5.4 Formulation of maintenance plans 6

6 Assessment 6
6.1 General 6
6.2 Assessment plan 7
6.2.1 Preparation of assessment plan 7
6.2.2 Category of assessment 7
6.2.3 Level of assessment 7
6.3 Investigation 8
6.4 Registration of condition 8
6.5 Evaluation and decision making 8

7 Repair 9
7.1 General 9
7.2 Planning and design 9
7.2.1 General 9
7.2.2 Option of remedial actions 9
7.2.3 Factors to consider 10
7.2.4 Choice of appropriate strategies 10
7.2.5 Choice of appropriate methods 11
7.2.6 Properties of materials, products and systems 11
7.2.7 Other remedial actions 11
7.3 Execution 12
7.3.1 General 12
7.3.2 General requirements 12
7.3.3 Structural stability before, under and after execution 12
7.3.4 Preparation of concrete substrate and reinforcement 12
7.3.5 Application of materials, products and systems 13
7.3.6 Quality control 13
7.3.7 Maintenance following completion of repair 13

8 Recording 13
8.1 General 13

8.2 Period of preservation 13
8.3 Method of recording 13
8.3.1 Format of records and its accessibility 13
8.3.2 Items included in records 13
8.3.3 Records concerning repair 14

Annex A (informative) Extended hierarchy of "standards for maintenance and repair of concrete structures" with national legislation and other related International Standards 15

Annex B (informative) Hierarchy of terms 16

Annex C (informative) Maintenance category 17
