## Design of concrete-filled steel tubular (CFST) hybrid structures

---

<b>Contents</b>		<b>Page</b>
Foreword .....		vii
Introduction .....		viii
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Symbols .....	5
5	Materials .....	7
5.1	General .....	7
5.2	Concrete .....	8
5.2.1	Cement .....	8
5.2.2	Aggregates .....	8
5.2.3	Water .....	8
5.2.4	Admixtures .....	8
5.2.5	Additions .....	8
5.2.6	Concrete mixture specification .....	8
5.3	Steel tubes .....	8
5.4	Steel reinforcement .....	9
5.4.1	Deformed reinforcement .....	9
5.4.2	Plain reinforcement .....	9
5.5	Other materials .....	9
5.5.1	Welding consumables .....	9
5.5.2	Fasteners .....	9
5.5.3	Protective paint systems .....	9
5.6	Storage of materials .....	9
6	Design and construction procedure .....	9
7	General guides .....	11
7.1	Limitations .....	11
7.1.1	CFST members .....	11
7.1.2	Trussed concrete-filled steel tubular (CFST) hybrid structures .....	12
7.1.3	Concrete-encased concrete-filled steel tubular (CFST) hybrid structures .....	12
7.2	Limit states .....	13
7.3	Ultimate limit state design format .....	14
7.3.1	General .....	14
7.3.2	Factored load effects .....	14
7.3.3	Design resistances .....	14
7.4	Serviceability limit state design format .....	15
8	Specific guides .....	15
8.1	Design working life .....	15
8.2	Selections of materials, structural plans and detailing .....	15
8.3	Seismic design requirements .....	15
8.4	Selections of constructional methods and techniques .....	15
9	Actions (loads) .....	16

9.1	General .....	16
9.2	Dead loads .....	16
9.3	Live loads .....	16
9.4	Snow loads .....	16
9.5	Wind forces .....	16
9.6	Earthquake forces .....	16
9.7	Thermal forces .....	17
9.8	Load partial factors and load combinations .....	17
10	Analysis .....	17
10.1	General .....	17
10.1.1	Structural analysis purpose .....	17
10.1.2	Structural analysis methods .....	17
10.1.3	Structural analysis requirements .....	17
10.1.4	Loading cases .....	18
10.1.5	Construction stage analysis .....	18
10.2	Stress-strain relationships for materials .....	18
10.2.1	General .....	18
10.2.2	Concrete .....	19
10.2.3	Steel .....	26
10.3	Indices for the strength and stiffness of CFST hybrid structures .....	28
10.3.1	CFST cross-section .....	28
10.3.2	CFST hybrid structures .....	30
11	Ultimate limit states of trussed concrete-filled steel tubular (CFST) hybrid structures .....	31
11.1	General .....	31
11.2	Resistances to compression and bending .....	31
11.2.1	Axial compression .....	31
11.2.2	Bending .....	34
11.2.3	Combined compression and bending .....	35
11.2.4	Resistances of CFST chords .....	39
11.2.5	Resistances of webs .....	45
11.3	Resistance to shear .....	46
11.3.1	With horizontal webs .....	46
11.3.2	With diagonal webs .....	46
12	Ultimate limit states of concrete-encased concrete-filled steel tubular (CFST) hybrid structures .....	46
12.1	General .....	46
12.2	Resistances of single-chord structures .....	46
12.2.1	Axial compression .....	46
12.2.2	Combined compression and bending .....	47
12.2.3	Tension .....	50
12.3	Resistances of four-chord structures .....	51
12.3.1	Axial compression .....	51
12.3.2	Combined compression and bending .....	51
12.4	Resistances of six-chord structures .....	55
12.4.1	Axial compression .....	55
12.4.2	Combined compression and bending .....	55
12.5	Resistances of slender structures .....	59
12.5.1	Axial compression .....	59
12.5.2	Combined compression and bending .....	60
12.6	Resistance subjected to long-term loading .....	60
12.7	Resistance to shear .....	60
12.8	Resistance to combined axial force, bending and shear .....	62
13	Serviceability limit states of concrete-filled steel tubular (CFST) hybrid structures .....	62
13.1	Calculation of structural response .....	62
13.2	Serviceability limitations .....	62
14	Protective design .....	62

14.1	General .....	62
14.1.1	Corrosion resistance .....	62
14.1.2	Fire resistance .....	63
14.1.3	Impact resistance .....	63
14.2	Design of corrosion resistance .....	63
14.2.1	Anti-corrosion measures .....	63
14.2.2	Corrosion resistance calculation .....	63
14.3	Design of fire resistance .....	64
14.3.1	Load ratio during fire .....	64
14.3.2	Fireproof coating .....	64
14.3.3	Fire resistance ratings .....	65
14.3.4	Detailing requirements .....	65
14.4	Design of impact resistance .....	66
14.4.1	Bending resistance under impact .....	66
14.4.2	Dynamic increase factor for circular CFST chords under impact .....	66
14.4.3	Deformation of circular CFST chords under impact .....	67
15	Connections .....	67
15.1	General .....	67
15.2	Joints of trussed concrete-filled steel tubular (CFST) hybrid structures .....	67
15.2.1	General requirements .....	67
15.2.2	Typical forms of joints .....	68
15.2.3	Welding requirements .....	69
15.2.4	Detailing requirements of webs .....	69
15.2.5	Inserted plate connections .....	70
15.2.6	Gusset plate connections .....	70
15.2.7	Intersecting welded plane K-joints and N-joints .....	71
15.2.8	Plane T-joints, Y-joints and X-joints .....	74
15.2.9	Multiplanar joints .....	74
15.3	Joints of concrete-encased concrete-filled steel tubular (CFST) hybrid structures .....	74
15.3.1	Steel beam-to-column ring plate joints .....	74
15.3.2	Reinforced concrete beam-to-column joints .....	75
15.3.3	Detailing requirements of beam-to-column joints .....	76
15.3.4	Connections between steel tubes .....	77
15.4	Column bases and supporting connections .....	78
15.4.1	Column bases and supporting connections of trussed CFST hybrid structures .....	78
15.4.2	Column bases of concrete-encased CFST hybrid structures .....	82
15.5	Fatigue design of joints .....	83
15.5.1	General requirements .....	83
15.5.2	Design methods .....	83
15.5.3	Hot spot stress ranges under constant amplitude fatigue .....	84
15.5.4	Hot spot stress ranges under variable amplitude fatigue .....	84
15.5.5	Detailing requirements .....	85
16	Construction and acceptance .....	86
16.1	General .....	86
16.2	Fabrication and erection of steel tubes .....	86
16.2.1	General .....	86
16.2.2	Documents .....	86
16.2.3	Fabrication .....	86
16.2.4	Surface protection .....	87
16.2.5	Transportation and erection .....	87
16.3	Construction of core concrete .....	87
16.3.1	General .....	87
16.3.2	General requirements .....	87
16.3.3	Mixture design .....	88
16.3.4	Requirements of self-compacting concrete .....	88
16.3.5	Use of cement plaster .....	88
16.3.6	Placement preparation .....	88
16.3.7	Placement methods .....	88
16.3.8	Placement process .....	88

16.3.9	Treatment of post-placement holes on steel tubes .....	88
16.3.10	Requirements of limiting values of core concrete void in steel tubes .....	88
16.4	Construction of concrete encasement .....	90
16.4.1	General .....	90
16.4.2	Construction preparation .....	90
16.4.3	Workability of concrete .....	90
16.4.4	Construction order .....	90
16.5	Inspection and acceptance .....	90
16.5.1	General .....	90
16.5.2	Steel structures .....	91
16.5.3	Core concrete .....	91
16.5.4	Concrete encasement .....	91
16.5.5	Documents and records .....	91
Annex A (informative) Long-term load coefficients for concrete-encased circular CFST hybrid structures .....		92
Annex B (informative) Fire resistance ratings of single-chord concrete-encased circular CFST hybrid structures .....		96
