Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms, definitions and symbols **1**
3.1 Terms and definitions 1
3.2 Symbols 3

4 Equipment **4**
4.1 General 4
4.2 Phicometer probe 6
4.3 Connection tube line and pulling rods 6
4.3.1 Connection tube line 6
4.3.2 Pulling rods 6
4.4 Equipment at ground surface 8
4.4.1 Pulling device 8
4.4.2 Pressure-volume control unit (CU) 8
4.4.3 Regulation system of the traction speed of the probe 8
4.5 Means of measurement and control 8
4.5.1 Time 8
4.5.2 Pressure, volume and pulling force 8
4.5.3 Axial displacement 9
4.5.4 Display of readings 9
4.5.5 Dimensions of the shearing zone of the probe 9

5 Test procedure **9**
5.1 Checks and measurements before insertion of the probe in the ground 9
5.2 Borehole drilling phase, probe placing phase and zero setting 9
5.3 Minimum spacing between tests 10
5.4 Teeth insertion phase 12
5.5 Shearing phase 14
5.5.1 Loading program – applied hold pressures in the probe 14
5.5.2 Successive shearing stages under pressure holds 14
5.5.3 End of the test 15

6 Back-filling of the phicometer borehole **15**

7 Safety requirements **15**

8 Test results **16**
8.1 General 16
8.2 Shearing curve graph — Shear strength parameters φ_i and c_i 16
8.3 Associated graphs 16
8.4 Adjustment and determination of the in situ phicometer angle of friction φ_i and the in situ phicometer cohesion c_i 16
8.5 Examples of adjustment and determination of the in-situ angle of friction φ_i and cohesion c_i 17

9 Reporting **18**
9.1 General 18
9.2 Field report 18
9.3 Test report 21
9.4 Tests log 22

Annex A (normative) **Characteristics of the phicometer probe** **23**
Annex B (normative) **Calibration, checks and corrections** **24**
Annex C (normative) **Execution of the PBST borehole** **28**
Annex D (normative) **Determination of the shear strength parameters** **30**
Annex E (informative) **Correlations to estimate p_{lM} from other soil resistance parameters q_c and N** **32**
Annex F (normative) **Accuracy and uncertainties** **33**
Annex G (informative) **Examples of adjustment and determination of the in situ phicometer angle of friction φ_i and cohesion c_i** **35**
Annex H (informative) **Example of installation of the PBST equipment** **40**
