DIN EN 15685:2025-12 (E)

Building hardware - Requirements and test methods - Multipoint locks, latches and locking plates - Characteristics and test methods

Contents

Page

European foreword ... 6

Introduction ... 7

1 Scope ... 8

2 Normative references ... 8

3 Terms, definitions, symbols and abbreviated terms ... 8
3.1 Terms and definitions ... 8
3.2 Symbols and abbreviated terms ... 12

4 Product characteristics ... 13
4.1 General ... 13
4.1.1 Essential characteristics ... 13
4.1.2 Dangerous substances ... 13
4.1.3 Return force of latch bolt ... 13
4.1.4 Strength of lever lock key ... 14
4.1.5 Strength of bolt action ... 14
4.1.6 Minimum follower restoring torque ... 14
4.2 Category of use (first digit) ... 14
4.2.1 Resistance to side force on latch bolt ... 14
4.2.2 Torque to operate the multipoint lock ... 15
4.2.3 Strength of follower stops ... 19
4.2.4 Torque resistance of lockable deadbolt operation by handle/knob ... 20
4.3 Durability characteristics (second digit) ... 22
4.3.1 Durability of latch action ... 22
4.3.2 Durability of locking action ... 22
4.3.3 Durability of locking snib mechanism ... 22
4.3.4 Durability of clenching ... 22
4.4 Door mass and closing force (third digit) ... 23
4.4.1 Door mass ... 23
4.4.2 Door closing force ... 23
4.5 Suitability for use on fire resistance and/or smoke control door set (forth digit) ... 23
4.5.1 General ... 23
4.5.2 Grade 0 ... 23
4.5.3 Grade A ... 24
4.5.4 Grade B ... 24
4.5.5 Grade N ... 24
4.6 Safety (fifth digit) ... 24
4.7 Corrosion resistance and temperature (sixth digit) ... 24
4.7.1 Corrosion resistance ... 24
4.7.2 Operation at extreme temperatures ... 25
4.8 Security of locking point (seventh digit) ... 25
4.8.1 General ... 25
4.8.2 Locking ... 25
4.8.3 Deadlocking ... 25
4.8.4 Characteristics to side force ... 26
4.8.5 Locking point projection ... 27
4.8.6 Resistance to disengaging force on locking point ... 28

4.8.7 Resistance to drilling and disengaging force on locking point 29
4.8.8 Strong key attack on lever locks 30
4.8.9 Torque resistance of lockable follower 31
4.8.10 Resistance to force on a box protected locking plate 32
4.8.11 Resistance to side force on locking plate 33
4.8.12 Protection against removal from door 33
4.9 Key identification of lever locks (eight digit) 34
4.9.1 Minimum number of detaining elements 34
4.9.2 Effective differs 34
4.9.3 Differing steps heights on key 35
4.9.4 Non-interpassing of key with just one interval differ 35
4.9.5 Coding protection 35
4.10 Security of anti-separation point (nine digit) 35
4.10.1 General 35
4.10.2 Anti-separation point bolt projection 35
4.10.3 Resistance to disengaging force of anti-separation point 36
4.10.4 Resistance to drilling and disengaging force of anti-separation point 37
4.10.5 Resistance to pulling force of anti-separation point 38
4.10.6 Resistance to drilling and pulling force of anti-separation point 39
4.10.7 Resistance to forcing of anti-lifting device for sliding door 40
4.10.8 Resistance to forcing of anti-lifting device with drill protection for sliding door 40
4.10.9 Resistance to pulling force on locking plate for anti-separation point 41
4.10.10 Resistance to anti-lifting force on locking plate 41
4.11 Clenching (tenth digit) 43

5 Testing, assessment and sampling methods 43
5.1 General 43
5.2 Test apparatus 44
5.2.1 Test door 44
5.2.2 Drilling machine 44
5.2.3 Test fixtures 45
5.3 Test procedure – Drilling procedure 45
5.4 Test methods – General 45
5.4.1 Dangerous substances 45
5.4.2 Return force of latch bolt 45
5.4.3 Strength of lever lock key 46
5.4.4 Strength of bolt action 46
5.4.5 Minimum follower restoring torque 49
5.4.6 Protection against removal from door 49
5.5 Test methods - Category of use 49
5.5.1 Resistance to side force on latch bolt 49
5.5.2 Torque to operate the multipoint lock 52
5.5.3 Strength of follower stops 52
5.5.4 Torque resistance of lockable follower 52
5.5.5 Torque resistance of rim lock with integral lockable handle/knob 53
5.6 Test methods - Durability 53
5.6.1 Durability of latch action without force applied 53
5.6.2 Durability of latch action with force applied 54
5.6.3 Durability of locking action 56
5.6.4 Durability of locking snib mechanism 58
5.6.5 Durability of clenching 58
5.7 Test methods - Door mass and closing force 60
5.7.1 Door mass 60

5.7.2 Door closing force 60
5.8 Suitability for use on fire resistance and smoke control doors 61
5.8.1 Grade A 61
5.8.2 Grade B 61
5.8.3 Grade N 61
5.9 Safety 61
5.10 Corrosion resistance and temperature 62
5.10.1 Corrosion resistance 62
5.10.2 Operation at extremes of temperature 62
5.11 Security of locking point 62
5.11.1 Locking 62
5.11.2 Torque resistance of lockable follower 63
5.11.3 Resistance to side force 64
5.11.4 Locking point bolt projection 67
5.11.5 Resistance to disengaging force on locking point 67
5.11.6 Resistance to drilling and disengaging force on locking point 68
5.11.7 Strong key attack on lever locks 69
5.11.8 Resistance to force on a box protected locking plate 69
5.11.9 Resistance to side force on locking plate 72
5.11.10 Protection against removal from door 73
5.12 Key identification of lever locks 73
5.12.1 Detaining elements verification 73
5.12.2 Effective differs verification 74
5.12.3 Differing steps heights on key 74
5.12.4 Non interpassing of key with just one interval differ 74
5.12.5 Coding protection 74
5.13 Security of anti-separation point 74
5.13.1 Anti-separation point bolt projection 74
5.13.2 Resistance to disengaging force of anti-separation point 74
5.13.3 Resistance to drilling and disengaging force of anti-separation point 74
5.13.4 Resistance to pulling force of anti-separation point 76
5.13.5 Resistance to drilling and pulling force of anti-separation point 76
5.13.6 Resistance to forcing of anti-lifting device for sliding door 77
5.13.7 Resistance to forcing of anti-lifting device with drill protection for sliding door 77
5.13.8 Resistance to pulling force on locking plate for anti-separation point 78
5.13.9 Resistance to lifting force on locking plate 78
5.14 Test methods - Clenching 80

6 Classification 80
6.1 Coding system 80
6.2 Classification 80
6.2.1 Category of use (first digit) 80
6.2.2 Durability (second digit) 81
6.2.3 Door mass and closing force (third digit) 81
6.2.4 Suitability for use on fire resistance and/or smoke control door set (fourth digit) 82
6.2.5 Safety (fifth digit) 82
6.2.6 Corrosion resistance and temperature (sixth digit) 82
6.2.7 Security for locking points (seventh digit) 83
6.2.8 Key identification of lever locks (eight digit) 83
6.2.9 Security for anti-separation points (nine digit) 83
6.2.10 Clenching points (tenth digit) 84
6.3 Example of classification for multipoint locks and their locking plates 84

7 Marking 84

7.1 On the product **84**
7.2 On the packaging **85**
Annex A (informative) **Test sampling and sequencing** **86**
Annex B (informative) **Product information** **90**
Bibliography **93**
