DIN EN 16613:2025-08 (E)

Glass in building - Laminated glass and laminated safety glass - Determination of interlayer viscoelastic properties

Contents

Page

European foreword ... 3

Introduction ... 4

1 Scope ... 5

2 Normative references ... 5

3 Terms and definitions ... 5

4 Symbols and abbreviations ... 7

5 Test procedure ... 9
5.1 General ... 9
5.2 Test specimens ... 11
5.3 Test method ... 11
5.3.1 Glass transition temperature T_g (Step 1) ... 11
5.3.2 Determination of the temperature and time dependent shear modulus $G_{int}(T,t)$ ... 11

6 Evaluation of the shear transfer characteristics ... 15
6.1 Determination of the temperature and time dependent shear modulus $G_{int}(T,t)$ ... 15
6.2 Load durations and temperature ranges ... 15

7 Test report ... 16

Annex A (normative) Bending creep method for the determination of the interlayer properties ... 17

Annex B (normative) Preparation of test specimens ... 26

Annex C (informative) Time-temperature-superposition principle and Prony series ... 27

Annex D (informative) Interlayer mechanical properties at different frequencies for a chosen temperature ... 30

Annex E (informative) Determination of the displacement of the point of contact between the support rollers and the plate ... 31
