## Building and civil engineering sealants - Determination of adhesion and cohesion properties of sealants after exposure to heat, water and artificial light through glass

---

| <b>Contents</b> |   | <b>Page</b> |
|-----------------|---|-------------|
| Foreword .....  |   | iv          |
| 1               | Scope .....   | 1           |
| 2               | Normative references .....                          | 1           |
| 3               | Terms and definitions .....                         | 1           |
| 4               | Principle .....                                     | 1           |
| 5               | Apparatus .....                                     | 2           |
| 5.1             | Glass supports .....                                | 2           |
| 5.2             | Spacers .....                                       | 2           |
| 5.3             | Anti-adherent substrate .....                       | 3           |
| 5.4             | Ventilated convection-type oven .....               | 3           |
| 5.5             | Container .....                                     | 3           |
| 5.6             | Test chamber with an artificial light source .....  | 3           |
| 5.7             | Artificial light source with suitable filters ..... | 3           |
| 5.8             | Black standard thermometer .....                    | 3           |
| 5.9             | Extension machine .....                             | 4           |
| 5.10            | Separators .....                                    | 4           |
| 5.11            | Measuring device .....                              | 4           |
| 6               | Preparation of specimens .....                      | 4           |
| 7               | Conditioning .....                                  | 4           |
| 7.1             | General .....                                       | 4           |
| 7.2             | Method A .....                                      | 4           |
| 7.3             | Method B .....                                      | 4           |
| 8               | Test procedures .....                               | 5           |
| 8.1             | General .....                                       | 5           |
| 8.2             | Exposure conditions .....                           | 5           |
| 8.2.1           | General .....                                       | 5           |
| 8.2.2           | Automatic cycling .....                             | 5           |
| 8.2.3           | Manual cycling .....                                | 5           |
| 8.3             | Elongation of the specimens .....                   | 5           |
| 9               | Test report .....                                   | 6           |
