|--|-----------|
| Foreword.....  | vi        |
| <b>1</b> <b>Scope</b> .....  | <b>1</b>  |
| <b>2</b> <b>Normative references</b> .....                           | <b>1</b>  |
| <b>3</b> <b>Terms and definitions</b> .....                          | <b>1</b>  |
| 3.1    Definitions.....  | 1         |
| 3.2    Symbols.....  | 3         |
| <b>4</b> <b>General provision concerning test pieces</b> .....       | <b>4</b>  |
| <b>5</b> <b>Test method for determining tensile properties</b> ..... | <b>4</b>  |
| 5.1    Test pieces.....  | 4         |
| 5.1.1    Types and dimensions.....                                   | 4         |
| 5.1.2    Preparation.....  | 5         |
| 5.1.3    Curing of test pieces.....                                  | 7         |
| 5.1.4    Anchorage portion of test pieces.....                       | 7         |
| 5.1.5    Conditioning of test pieces.....                            | 7         |
| 5.1.6    Number of test pieces.....                                  | 8         |
| 5.2    Testing machine and measuring devices.....                    | 8         |
| 5.2.1    Testing machine.....  | 8         |
| 5.2.2    Strain gauges/extensometers.....                            | 8         |
| 5.3    Test method.....  | 8         |
| 5.3.1    Dimensions of test pieces.....                              | 8         |
| 5.3.2    Mounting of strain gauges/extensometers.....                | 8         |
| 5.3.3    Mounting of test piece.....                                 | 8         |
| 5.3.4    Loading rate.....   | 8         |
| 5.3.5    Test temperature.....                                       | 8         |
| 5.3.6    Range of test.....  | 8         |
| 5.4    Calculation and expression of test results.....               | 9         |
| 5.4.1    General.....  | 9         |
| 5.4.2    Load-strain curve.....                                      | 9         |
| 5.4.3    Tensile strength.....                                       | 9         |
| 5.4.4    Young's modulus.....  | 10        |
| 5.4.5    Ultimate strain.....  | 10        |
| 5.5    Test report.....  | 10        |
| <b>6</b> <b>Test method for overlap splice strength</b> .....        | <b>11</b> |
| 6.1    Test pieces.....  | 11        |
| 6.1.1    Dimensions.....   | 11        |
| 6.1.2    Preparation.....  | 11        |
| 6.1.3    Curing of test pieces.....                                  | 12        |
| 6.1.4    Anchorage portion of test pieces.....                       | 12        |
| 6.1.5    Conditioning of test pieces.....                            | 12        |
| 6.1.6    Number of test pieces.....                                  | 12        |
| 6.2    Testing machine.....  | 13        |
| 6.3    Test method.....  | 13        |
| 6.3.1    Dimensions of test pieces.....                              | 13        |
| 6.3.2    Mounting the test piece.....                                | 13        |
| 6.3.3    Loading rate.....   | 13        |
| 6.3.4    Range of test.....  | 13        |
| 6.4    Calculation and expression of test results.....               | 13        |
| 6.4.1    General.....  | 13        |
| 6.4.2    Failure categories.....                                     | 13        |

|           |   |           |
|-----------|---|-----------|
| 6.4.3     | Overlap-splice strength.....  | 14        |
| 6.5       | Test report.....  | 14        |
| <b>7</b>  | <b>Test method for determining bond properties of FRP sheets to concrete.....</b> | <b>15</b> |
| 7.1       | Test pieces.....  | 15        |
| 7.1.1     | Types and dimensions.....   | 15        |
| 7.1.2     | Quality of concrete.....  | 17        |
| 7.1.3     | Steel bars.....   | 17        |
| 7.1.4     | Preparation of test pieces.....   | 17        |
| 7.1.5     | Conditioning of test pieces.....  | 18        |
| 7.1.6     | Number of test pieces.....  | 19        |
| 7.2       | Testing machine and measuring devices.....  | 19        |
| 7.2.1     | Testing machine.....  | 19        |
| 7.2.2     | Chucks.....   | 19        |
| 7.3       | Test method.....  | 19        |
| 7.3.1     | Dimensions of the test pieces.....  | 19        |
| 7.3.2     | Mounting of test pieces.....  | 19        |
| 7.3.3     | Loading rate.....   | 19        |
| 7.3.4     | Test temperature.....   | 19        |
| 7.3.5     | Range of test.....  | 19        |
| 7.4       | Calculation and expression of test results.....                                   | 19        |
| 7.4.1     | General.....  | 19        |
| 7.4.2     | Failure categories.....   | 19        |
| 7.4.3     | Interfacial fracture energy.....  | 20        |
| 7.4.4     | Bond strength.....  | 20        |
| 7.5       | Test report.....  | 20        |
| <b>8</b>  | <b>Test method for direct pull-off strength of FRP sheets with concrete.....</b>  | <b>21</b> |
| 8.1       | Test pieces.....  | 21        |
| 8.1.1     | Dimensions.....   | 21        |
| 8.1.2     | Preparation.....  | 21        |
| 8.1.3     | Mounting of steel devices and notching.....                                       | 21        |
| 8.1.4     | Conditioning of test pieces.....  | 22        |
| 8.1.5     | Number of test pieces.....  | 22        |
| 8.2       | Testing machine and measuring devices.....  | 22        |
| 8.3       | Test method.....  | 23        |
| 8.3.1     | Setting up the testing machine.....   | 23        |
| 8.3.2     | Loading rate.....   | 23        |
| 8.3.3     | Test temperature.....   | 23        |
| 8.3.4     | Scope of test.....  | 23        |
| 8.4       | Calculation and expression of test results.....                                   | 23        |
| 8.4.1     | Handling of data.....   | 23        |
| 8.4.2     | Bond strength.....  | 23        |
| 8.4.3     | Failure categories.....   | 23        |
| 8.5       | Test report.....  | 24        |
| <b>9</b>  | <b>Test method for freeze/thaw resistance.....</b>                                | <b>24</b> |
| 9.1       | Test pieces.....  | 24        |
| 9.1.1     | Types and dimensions.....   | 24        |
| 9.1.2     | Number of test pieces.....  | 24        |
| 9.2       | Testing machine and measuring devices.....  | 24        |
| 9.2.1     | Freeze/thaw testing machine.....  | 24        |
| 9.2.2     | Tensile testing machine.....  | 25        |
| 9.3       | Test method.....  | 25        |
| 9.3.1     | Freezing and thawing method.....  | 25        |
| 9.3.2     | Control of freezing and thawing temperatures.....                                 | 25        |
| 9.3.3     | Tensile strength test and overlap splice strength test.....                       | 25        |
| 9.4       | Calculation and expression of test results.....                                   | 25        |
| 9.4.1     | Tensile strength retention.....   | 25        |
| 9.4.2     | Overlap splice strength retention.....  | 26        |
| 9.5       | Test report.....  | 26        |
| <b>10</b> | <b>Test method for exposure to laboratory light sources.....</b>                  | <b>27</b> |
| 10.1      | Test pieces.....  | 27        |
| 10.1.1    | Accelerated artificial exposure plate.....  | 27        |

|           |   |           |
|-----------|---|-----------|
| 10.1.2    | Number of accelerated artificial exposure plates.....                             | 27        |
| 10.1.3    | Types and dimensions.....   | 27        |
| 10.1.4    | Number of test pieces.....  | 27        |
| 10.2      | Testing machine and measuring devices.....  | 27        |
| 10.3      | Test method.....  | 28        |
| 10.3.1    | Test period.....  | 28        |
| 10.3.2    | Tensile strength test and overlap splice strength test.....                       | 28        |
| 10.4      | Calculation and expression of test results.....                                   | 28        |
| 10.4.1    | Visual inspection.....  | 28        |
| 10.4.2    | Handling of data.....   | 28        |
| 10.4.3    | Tensile strength retention.....   | 28        |
| 10.4.4    | Overlap-splice strength retention.....  | 29        |
| 10.5      | Test report.....  | 29        |
| <b>11</b> | <b>Test method for durability.....</b>  | <b>30</b> |
| 11.1      | Types of test methods for durability.....   | 30        |
| 11.2      | Test piece.....   | 30        |
| 11.2.1    | Durability test for pull-off strength — Test A.....                               | 30        |
| 11.2.2    | Durability test for bond properties — Test B.....                                 | 30        |
| 11.2.3    | Durability test for overlap splice strength — Test C.....                         | 30        |
| 11.3      | Test method.....  | 31        |
| 11.3.1    | Durability test for pull-off strength — Test A.....                               | 31        |
| 11.3.2    | Durability test for bond properties — Test B: dry-and-wet-cycle test.....         | 32        |
| 11.3.3    | Durability test for overlap splice strength — Test C: dry-and-wet-cycle test..... | 32        |
| 11.4      | Calculation and expression of test results.....                                   | 32        |
| 11.4.1    | Durability test for pull-off strength — Test A.....                               | 32        |
| 11.4.2    | Durability test for bond properties — Test B.....                                 | 32        |
| 11.4.3    | Durability test for overlap splice strength — Test C.....                         | 32        |
| 11.5      | Test report.....  | 32        |
| 11.5.1    | Durability test for pull-off strength — Test A.....                               | 32        |
| 11.5.2    | Durability test for bond properties — Test B.....                                 | 32        |
| 11.5.3    | Durability test for overlap splice strength — Test C.....                         | 33        |
