Environmental management for concrete and concrete structures - Part 5: Execution of concrete structures

| Contents | | Page |
|--------------------|---|-------------|
| Foreword | | iv |
| Introduction | | v |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Terms and definitions | 1 |
| 4 | Symbols | 2 |
| 5 | Principles and procedure for environmental management related to execution of concrete structures | 2 |
| 5.1 | Principles | 2 |
| 5.2 | Procedure | 3 |
| 5.3 | Confirmation of the client brief and design documents and specifications | 4 |
| 5.4 | Setting of the environmental performance requirements | 5 |
| 5.4.1 | Selection of impact categories | 5 |
| 5.4.2 | Setting of indicators | 5 |
| 5.4.3 | Setting of environmental performance requirements for indicators | 5 |
| 5.5 | Formulation of the construction plan | 6 |
| 5.6 | Estimation | 6 |
| 5.7 | Verification | 6 |
| 5.8 | Execution of construction and related works | 7 |
| 5.9 | Inspection | 7 |
| 5.10 | Documentation | 7 |
| | Annex A (informative) Example of indicators for the environmental management | 8 |
| | Annex B (informative) Examples of the methods of environmental consideration in execution | 12 |
| | Annex C (informative) Example of environmental management of concreting works - Migration of energy source for concrete pumps- | 16 |
| | Bibliography | 20 |
