DIN EN 1993-1-11:2026-12 (E)

Eurocode 3 - Design of steel structures - Part 1-11: Tension components

Contents

Page

European foreword 5

0 Introduction 7

1 Scope 9
1.2 Assumptions 9

2 Normative references 10

3 Terms, definitions and symbols 10
3.1 Terms and definitions 10
3.1.1 Components and elements 10
3.1.2 Material properties 12
3.1.3 Manufacturing and installation 12
3.2 Symbols 13
3.2.1 General 13
3.2.2 Latin upper-case symbols 13
3.2.3 Latin lower-case symbols 14
3.2.4 Greek upper-case symbols 15
3.2.5 Greek lower-case symbols 15
3.3 Groups 16

4 Basis of design 17
4.1 General rules 17
4.1.1 Basic requirements 17
4.1.2 Structural reliability 17
4.2 Principle of limit state design 17
4.3 Actions 18
4.3.1 Self-weight of tension components 18
4.3.2 Wind action 18
4.3.3 Ice loading 18
4.3.4 Thermal actions 18
4.3.5 Prestressing 18
4.3.6 Replacement and accidental loss of tension components 18
4.3.7 Fatigue action 19
4.4 Verification by the partial factor method 19

5 Material 20
5.1 General 20
5.2 Group A tension elements 21
5.2.1 Nominal tensile strength and nominal yield strength 21
5.2.2 Modulus of elasticity 21
5.2.3 Creep and relaxation 21
5.3 Group B tension elements 22
5.3.1 Nominal tensile strength grade of steel wires 22
5.3.2 Modulus of deformation 22
5.3.3 Creep and relaxation 23
5.3.4 Friction coefficients 23
5.4 Group C tension elements 24
5.4.1 Nominal tensile strength grade of steel wires and strands 24
5.4.2 Modulus of elasticity 24
5.4.3 Creep and relaxation 24

5.4.4 Friction coefficients ... 24

6 Durability ... 25

7 Structural analysis ... 25
7.1 General ... 25
7.2 Nonlinear effects from deformations ... 25
7.3 Nonlinear analysis ... 26
7.4 Dynamic analysis ... 26
7.5 Aerodynamic instability ... 27

8 Ultimate limit states ... 27
8.1 General ... 27
8.2 Group A tension components ... 28
8.2.1 Tension rod system made of structural steel or stainless steel ... 28
8.2.2 Tension rod system made of concrete reinforcement steel or prestressing steel ... 28
8.3 Group B tension components ... 29
8.4 Group C tension components ... 30
8.5 Saddles ... 30
8.5.1 General ... 30
8.5.2 Group B tension components ... 31
8.5.3 Group C tension components ... 33
8.6 Clamps ... 36
8.6.1 General ... 36
8.6.2 Prevention of slipping of clamps ... 37
8.6.3 Transverse pressure ... 40

9 Serviceability limit states ... 41

10 Fatigue ... 41
10.1 General ... 41
10.2 Terminations ... 41
10.3 Tension elements ... 41

11 Testing ... 43

Annex A (normative) Product and test requirements for tension components ... 45

A.1 Use of this annex ... 45
A.2 Scope and field of application ... 45
A.3 Group A tension components ... 45
A.4 Group B tension components ... 48
A.5 Group C tension components ... 54

Annex B (informative) Glossary ... 63

B.1 Use of this annex ... 63
B.2 Scope and field of application ... 63
B.3 Group A tension components ... 64
B.4 Group B tension components ... 68
B.5 Group C tension components ... 72
B.6 Group D parallel wire tension components ... 76

Annex C (normative) Additional rules for parallel wire tension components for suspended structures (Group D) ... 78

C.1 Use of this annex ... 78
C.2 Scope and field of application ... 78
C.3 Materials ... 78
C.4 Ultimate limit states ... 79

Bibliography ... 84
