ISO 7728:2026-03 (E)

Typical horizontal joints between an external wall of prefabricated ordinary concrete components and a concrete floor - Properties, characteristics and classification criteria

Contents

Page

Foreword iv

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Properties of joints and agents to which they are exposed 2
4.1 Properties 2
4.2 Agents to which joints are exposed 3

5 Characteristics of joints 4
5.1 General 4
5.2 Thermal transmission between internal and external environments 4
5.3 Influence of joint on acoustical insulation of the floor 4
5.4 Air permeability of joints (between either external and internal environments, or spaces separated by the floor) 4
5.5 Water tightness 4
5.5.1 General 4
5.5.2 Sealing and waterproofing measures of joints 6
5.5.3 Overlap 7
5.5.4 Capillary break 7
5.5.5 Air tightness 7
5.6 Water vapour condensation on the internal face of the wall and floor in the vicinity of the joint 7
5.7 Transmission of forces 8
5.7.1 Load-bearing external wall, self-supporting external wall 8
5.7.2 Supported external wall 8
5.8 Fire resistance 8
5.9 Emission of gases or toxic fumes in the event of fire 8
5.10 Internal and external appearance 8
5.11 Durability 8

6 Other indications to be given 9
6.1 Maintenance of jointing materials 9
6.2 Replacement of degradable jointing materials 9
6.3 Dismantling and reassembling components 9

7 Dimensional coordination 9

8 Classification criteria 9
