ISO 20895:2026-04 (E)

Welded joints performance for seismic steel structures

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Welded joints **2**
4.1 Applicable structural performance 2
4.2 Mechanical properties of base metal 3
4.2.1 Toughness of base metal 3
4.2.2 Tensile strength of base metal 3

5 Mechanical testing **3**
5.1 Type of testing 3
5.2 Test specimens 3
5.2.1 Shape and dimensions of specimens 3
5.2.2 Specimen location, notch orientation and number of specimens 4
5.2.3 Preparation of specimens 15
5.3 Testing procedure 15
5.3.1 Weld metal longitudinal tensile testing 15
5.3.2 Charpy impact tests 16

6 Acceptance criteria **16**
6.1 Basic Demand 16
6.1.1 General 16
6.1.2 Acceptance criteria for tensile tests 16
6.1.3 Acceptance criteria for impact tests 16
6.2 Critical Demand 16
6.2.1 General 16
6.2.2 Acceptance criteria for tensile test 16
6.2.3 Acceptance criteria for impact test 16

7 Re-testing **17**

8 Test reports **17**

Annex A (informative) **Example welded joints of steel structures** **18**

Annex B (informative) **Relationship between the structural performance and the acceptance criteria for Critical Demand** **27**

Bibliography **30**
