DIN EN 17542-5:2026-11 (E)

Earthworks - Geotechnical laboratory tests - Part 5: Test method for measurement of one-dimensional swelling of soils under oedometric condition

Contents

Page

European foreword ... 3

Introduction ... 4

1 Scope ... 5

2 Normative references ... 5

3 Terms, definitions, symbols and abbreviated terms ... 5
3.1 Terms and definitions ... 5
3.2 Symbols and abbreviated terms ... 6

4 Tests principle ... 7
4.1 Method A: One dimensional wetting-induced swelling pressure of a soil ... 7
4.2 Method B: Axial swelling index of a specimen under a defined vertical stress ... 7
4.3 Method C: Constrained swelling pressure of a specimen after wetting ... 8

5 Equipment and test material ... 8

6 Operating procedures ... 8
6.1 General ... 8
6.2 Specimen preparation ... 9
6.2.1 Reconstituted specimen ... 9
6.2.2 Undisturbed sample ... 9
6.3 Conduct of the tests ... 9
6.3.1 Method A: One dimensional wetting-induced swelling pressure of a soil ... 9
6.3.2 Method B: Axial swelling index of a specimen under a defined vertical stress ... 11
6.3.3 Method C: Constrained swelling pressure of a specimen after wetting ... 12

7 Test report ... 13

Annex A (informative) Measurement of swelling pressure according to EN 17542-5 — Test report ... 15

Annex B (informative) Measurement of axial swelling index according to EN 17542-5 — Test report ... 18

Annex C (informative) Measurement of constrained swelling pressure according to EN 17542-5 — Test report ... 20
