ISO/TR 19115-4:2026-10 (E)

Geographic information - Metadata - Part 4: JSON schema implementation of metadata fundamentals

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Basic approach and design decisions ... **1**
4.1 Overview ... 1
4.2 General approach and workflow ... 1
4.3 JSON representation ... 2
4.4 Profile on conceptual content ... 3
4.5 ISO 19115-4 (this document) UML and ISO 19157-1 UML implementation models for JSON ... 3
4.6 JSON reference instance document ... 4
4.7 UML to JSON encoding rules and automated generation of JSON schema ... 5
4.8 Multilingual adaptability ... 5

5 Encoding approach and rules ... **5**
5.1 UML to JSON encoding rules ... 5
5.1.1 Overview ... 5
5.1.2 General rules for transforming UML to JSON schema ... 5
5.1.3 Details and deviations ... 5
5.1.4 Code lists ... 7
5.1.5 Missing JSON base types ... 8
5.2 Modularization ... 9
5.3 UML implementation model for JSON implementation ... 10

Annex A (informative) **Defined profile (subset) on ISO 19115-1 and ISO 19157-1** ... **12**

Annex B (informative) **Geographic metadata JSON schema resources** ... **17**

Annex C (informative) **Implementation example** ... **18**

Bibliography ... **19**
