ISO/TR 15656:2003-12 (E)

Fire resistance - Guidelines for evaluating the predictive capability of calculation models for structural fire behaviour

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Background information 2
4.1 General 2
4.2 Potential users and their needs 2

5 Outline of methodology 6

6 Definition and documentation of model and scenario 7
6.1 Types of models 7
6.2 Documentation 9
6.3 Deterministic versus probabilistic 10

7 Evaluation 10
7.1 Sources of errors in predictions 10
7.2 Model application and use 11
7.3 Model theoretical basis 12
7.4 Model solution 12
7.5 Comparison of model results 14
7.7 Model sensitivity 18
