DIN EN ISO 19114:2005-05 (E)

Geographic information - Quality evaluation procedures (ISO 19114:2003); English version EN ISO 19114:2005

Contents

Page

Foreword ... 4

Introduction ... 5

1 Scope ... 6

2 Conformance ... 6

3 Normative references ... 6

4 Terms and definitions ... 6

5 Abbreviated terms ... 7

6 Process for evaluating data quality ... 8
6.1 General ... 8
6.2 Components of the process ... 8

7 Data quality evaluation methods ... 9
7.1 Classification of data quality evaluation methods ... 9
7.2 Direct evaluation methods ... 10
7.3 Indirect evaluation method ... 11
7.4 Data quality evaluation examples ... 12

8 Reporting data quality evaluation information ... 12
8.1 Reporting as metadata ... 12
8.2 Reporting in a quality evaluation report ... 12
8.3 Reporting aggregated data quality result ... 12

Annex A (normative) **Abstract test suites** ... 13
A.1 Introduction ... 13
A.2 Quality evaluation procedures ... 13
A.3 Evaluating data quality ... 13
A.4 Reporting data quality ... 13

Annex B (informative) **Uses of quality evaluation procedures** ... 14
B.1 Introduction ... 14
B.2 Development of a product specification or user requirements ... 14
B.3 Quality control during dataset creation ... 14
B.4 Inspection for conformance to a product specification ... 14
B.5 Evaluation of dataset conformance to user requirements ... 14
B.6 Quality control during dataset update ... 14

Annex C (informative) **Applying quality evaluation procedures to dynamic datasets** ... 15
C.1 Introduction ... 15
C.2 Determining and reporting the quality of a dynamic dataset ... 15
C.3 Establishing continuous quality evaluation procedures ... 15
C.4 Periodically re-establish the reference quality of the dataset ... 16

Annex D (informative) **Examples of data quality measures** ... 17
D.1 Introduction ... 17
D.2 Relationship of the data quality components ... 17
D.3 Examples of data quality completeness measures ... 19
D.4 Examples of data quality logical consistency measures ... 20
D.5 Examples of data quality positional accuracy measures ... 24
D.6 Examples of data quality temporal accuracy measures ... 28
D.7 Examples of data quality thematic accuracy measures ... 31

Annex E (informative) **Guidelines for sampling methods applied to geographic datasets** ... 35

E.1 Introduction 35
E.2 Lot and item 35
E.3 Sample size 35
E.4 Sampling strategies 36
E.5 Probability-based sampling 39

Annex F (informative) **Example of testing for thematic accuracy and completeness** 41
F.1 Introduction 41
F.2 Quality evaluation process 41
F.3 Method for data quality evaluation 41
F.4 Inspection for quality 42
F.5 Determination of data quality results and conformance 43
F.6 Reporting quality results 44

Annex G (informative) **Example of measurement and reporting of completeness and thematic accuracy** 47
G.1 Introduction 47
G.2 Dataset description 47
G.3 Evaluation of data quality 52
G.4 Reporting quality results 55

Annex H (informative) **Example of an aggregated data quality result** 58
H.1 Introduction 58
H.2 Dataset description 58
H.3 Universe of discourse 59
H.4 Dataset 60
H.5 Aggregation of evaluation results and reporting 60

Annex I (normative) **Reporting quality information in a quality evaluation report** 62
I.1 Introduction 62
I.2 Quality evaluation report components 62

Annex J (informative) **Aggregation of data quality results** 66
J.1 Introduction 66
J.2 100 % pass/fail 66
J.3 Weighted pass/fail 66
J.4 Subset of results sufficient for product purpose 67
J.5 Maximum/minimum value 67

Bibliography 68
