## General principles on reliability for structures

---

| <b>Contents</b> |  | <b>Page</b> |
|-----------------|--|-------------|
| <b>1</b>        | <b>Scope .....</b>   | <b>1</b>    |
| <b>2</b>        | <b>Definitions .....</b>   | <b>1</b>    |
| <b>3</b>        | <b>Symbols .....</b>   | <b>5</b>    |
| <b>4</b>        | <b>Requirements and concepts .....</b>                                 | <b>6</b>    |
| 4.1             | Fundamental requirements .....   | 6           |
| 4.2             | Reliability differentiation of structures .....                        | 7           |
| 4.3             | Structural design .....  | 8           |
| 4.4             | Compliance .....   | 9           |
| 4.5             | Durability and maintenance .....                                       | 10          |
| <b>5</b>        | <b>Principles of limit states design .....</b>                         | <b>11</b>   |
| 5.1             | Limit states .....   | 11          |
| 5.2             | Design .....   | 12          |
| <b>6</b>        | <b>Basic variables .....</b>   | <b>13</b>   |
| 6.1             | General .....  | 13          |
| 6.2             | Actions .....  | 14          |
| 6.3             | Environmental influences .....   | 15          |
| 6.4             | Properties of materials .....  | 16          |
| 6.5             | Geometrical quantities .....   | 16          |
| <b>7</b>        | <b>Models .....</b>  | <b>16</b>   |
| 7.1             | General .....  | 16          |
| 7.2             | Types of models .....  | 17          |
| 7.3             | Model uncertainties .....  | 20          |
| 7.4             | Design based on experimental models .....                              | 21          |
| <b>8</b>        | <b>Principles of probability-based design .....</b>                    | <b>21</b>   |
| 8.1             | General .....  | 21          |
| 8.2             | Systems reliability versus element reliability .....                   | 22          |
| 8.3             | Specified degrees of required reliability .....                        | 23          |
| 8.4             | Calculation of failure probabilities .....                             | 23          |
| 8.5             | Implementation of probability-based design .....                       | 24          |
| <b>9</b>        | <b>Partial factors format .....</b>                                    | <b>24</b>   |
| 9.1             | Design conditions and design values .....                              | 24          |
| 9.2             | Representative values of actions .....                                 | 26          |
| 9.3             | Characteristic values of properties of materials including soils ..... | 26          |
| 9.4             | Characteristic values of geometrical quantities .....                  | 27          |
| 9.5             | Load cases and load combinations .....                                 | 27          |
| 9.6             | Action effects and resistances .....                                   | 27          |
| 9.7             | Verification for fatigue .....   | 28          |
| 9.8             | Calibration .....  | 28          |
| <b>10</b>       | <b>Assessment of existing structures .....</b>                         | <b>28</b>   |
| 10.1            | Relevant cases .....   | 28          |
| 10.2            | Principles of assessment .....   | 28          |
| 10.3            | Basic variables .....  | 29          |
| 10.4            | Investigation .....  | 29          |

|             |  |           |
|-------------|--|-----------|
| <b>10.5</b> | <b>Assessment in the case of damage .....</b>  | <b>30</b> |
|             | <b>Annex A: Quality management and quality assurance .....</b>   | <b>31</b> |
|             | <b>Annex B: Examples of permanent, variable and accidental actions 35 Annex C: Models for fatigue .</b>                                    | <b>37</b> |
|             | <b>Annex D: Design based on experimental models .....</b>  | <b>40</b> |
|             | <b>Annex E: Principles of reliability-based design .....</b>   | <b>50</b> |
|             | <b>Annex F: Combination of actions and estimation of action values 62 Annex G: Example of a<br/>method of combination of actions .....</b> | <b>71</b> |
|             | <b>Annex H: Index of definitions .....</b>   | <b>73</b> |
